1. Introduction

Prince Lord Prof. PhD Momtchil Dobrev-Halachev and Princess Prof. Mariola Garibova-Dobrev developed 2006 “Theory of degree of justice / injustice /” based on their practice in court, prosecutor's office, state and especially the practice of Prof. Mariola Garibova-Dobrev as a judge with decades of experience as a civil and criminal judge . Prof. Momtchil Dobrev co-founded 2003 Theory of Corruption and Theory of Mafia and Theory and Practice of Mafia, which contribute to clearing the Theory of the Degree of Justice / Injustice.

Lord Prof. PhD Momtchil Dobrev-Halachev and Prof. Mariola Garibova-Dobrev developed 2006 “Theory of degree of democracy” and “Theory of degree of justice / injustice /” based on their practice in court, prosecutor's office, state and especially the practice of Prof. Mariola Garibova-Dobrev as a judge for decades experience as such as a civil and criminal judge and Prof. Momtchil Dobrev participated as an observer in various types of elections. Prof. Momtchil Dobrev created in 2003 Theory of Corruption and Theory of Mafia and Theory and Practice of Mafia, which contribute to clearing the Theory of Democracy .

Lord Prof. Momtchil Dobrev and Lady Prof. Mariola Garibova developed in 2006. Theory of socio-humanism, which theory represents a social system of political, social, economic, humanistic management of society that opposes the modern capitalism of the global Masonic mafia elite and its deep rule and deep state.

Theory of socio-humanism puts the government on a new principled basis, both the political governance of a country in the modern world and the new economic governance in a country based on the new principled

basis, the new governance in the judiciary, the new governance in the ecological system, the social system, the system of education, health care, climate and ecology, culture and a system of direct control of the whole system - through a system of direct democracy.

The theory of socio-humanism is a critique of modern global neoliberal capitalism and its structure of government both in each country and at the international level and provides a solution for creating a new social system - more harmonious and humanistic and centered on man's ecological system. in which he lives.

Theory of socio-humanism puts new principles the whole government of a country in accordance with the ecological system, and the creative, creative qualities of each person, a new economic system, a new social system, a new ecological system related to man, a new political system of direct democracy and governance through referendums.

In the year 2001 Lord Prof. Momtchil DObrev developed the Theory of the mafia and Theory of corruption. All the both theories has been developed by analyzing the mafia and the corruption all over the wrld. In Bulgaria, germany, European Union, and other countires.

In the year 2010 Lord Prof. Momtchil Dobrev developed the 'Theory of Mafiotismus' as a new type of government oriented solely in the private interests of individuals and private institutions.

1.1 Introduce the Problem

The problem of justice / injustice is a major problem in a society. This problem appeared at all levels of development and existence, it is managed in one society. This problem appears in the field of state administration, in the parliament, in the court, the prosecutor's office, the police, all kinds of state institutions, municipal institutions. This problem, when it is huge, destroys a society.

The problem of the degree of democracy in a country and a society is a major problem in a society. In reality, Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobрева believe that the most important consideration of a democracy is its DEGREE OF DEMOCRACY. In reality, THE DEGREE OF DEMOCRACY IS THE ONE WHICH GIVES THE MOST ACCURATE AND SELECTIVE CLARITY ABOUT DEMOCRACY AND ITS LEVEL IN ONE COUNTRY AND ONE SOCIETY. It is precisely the degree of democracy that can and clearly determines the state and level of democracy in a country and a society.

The problem of the crisis of the current capitalist global neoliberal society is enormous and leads to the real demise of our civilization.

Theory of socio-humanism of Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobрева create a system for a new society with new principles of social, political, economic, social, ecological life of the countries on the planet Earth. This system of a new society will provide a real rest of civilization and the preservation of this civilization. This system completely replaces the capitalist system which is the real cause of the crises of society, the creation of inequalities, the robbery of entire countries, peoples, consumers of a global Masonic mafia elite that governs countries all over the world through a deep government and a deep state.

3. Princess Lady Prof. Mariola Garibova-Dobreva's and Prince Lord Prof. Momtchil DObrev-

Halachev's THEORY OF THE DEGREE OF JUSTICE / INJUSTICE - LAG OF JUSTICE

Injustice at global, national, religious, level,

When the degree of injustice reaches a critical point - a lag of injustice - the first lag, the country or people concerned, or the relevant decision of a judge is against the law and is evidence of mafia and corruption perish and disappear.

Corruption violates every law and does not bear any responsibility.

The degree of injustice is directly dependent on the degree of corruption.

Degradation of legal consciousness.

Non-compliance with the law becomes a legal and moral norm in a country. In the United States, for example, this was evidenced by judges' decisions regarding election irregularities in the United States 2020.

Moral degradation of judges, of prosecutors is moral.

The norm is the criminal model of consciousness.

Vices become virtues, virtues the object of ridicule and ridicule and mockery.

Demographic restructuring.

Growing inefficiency of social functions the growth of impoverishment

DEGREE OF INJUSTICE/JUSTICE - depends on the degree of MAFIOTISM in a society, the degree of corruption among law enforcement agencies and those involved in passing laws, the degree of trust of civil society in all participants in government - court, state prosecutor's office, how and whether judges and prosecutors obey the law, enforce the law, enforce the law, fail to enforce, break the law
prosecutor's office, state, municipalities.

The DEGREE OF DEMOCRACIZATION OF A SOCIETY depends on the respective DEGREE OF UNJUSTICE / JUSTICE.

FORMULA JUSTICE / INJUSTICE:

JUSTICE / INJUSTICE = POWER + Influence + Relationships + Interests + MONEY / AND + Mafia structure / internal or external / + Monopoly rights / rights + laws / rules / practices / procedures + possibility to make an alternative decision - Obligation - Responsibility - morality ethics - observance / application / implementation of the law by judges / prosecutors / statesmen - Control / Sanctions - Corruption - Mafiaization - TRUST / DEGREE OF TRUST.

There is a very rapid improvement in the financial situation of judges and prosecutors close to the government and the mafia. This only happens in three to four years. Judges and prosecutors buy homes with bank loans, just to cover up their extra income as judges - mostly unproven. The proof of the existence of corrupt practices and the receipt of bribes from judges is the fact that in just two or three years judges and prosecutors repay the loans taken by banking institutions for the purchase of their apartments. An analysis of income proves that it is practically impossible with their income as judges or prosecutors to pay their mortgages to banking institutions in just two or three years.

The struggle for who to become a judge or prosecutor in Bulgaria is growing in size that is not observed in any profession in Bulgaria. On the contrary, in Western countries, young people prefer to gain experience and become lawyers, and only after solving their material needs do they turn to the judicial profession. It is even a concrete fact that judges in the Western countries become persons with many years of experience as lawyers and at the age of 40-50.

There are cases of acquiring property for millions of leva as prosecutor Balev - a house worth a million leva, judges from the Supreme Court of Cassation, the Sofia City Court, criminal judges in just two or three years acquire studios for 130,000 euros, then become chairmen of the Specialized Courts - where corruption and the mafia in the country need to be investigated, not just criminal groups.

Judicial practice is that: According to a survey, up to 89 percent of cases are bought. There are cases when the judge himself demands money from the parties. And which party gave more money in favor of that country, the relevant decision is made.

According to a study, judges want bribes as follows:

- 28% in person (
- 33% of relatives and relatives
- 19% through other magistrates
- 29% through forging
- Only 2% no answer.

It is a common practice for a magistrate in court to have a relative lawyer through whom the bribery is negotiated.

It is also a common corrupt practice that whole families are judges in the courts. For example, Judges NEchevi - a family member in the Sofia City Court, Judge Valkov and - a judge in the Sofia City Court, his wife a judge in the SRS

Judges in the Supreme Court of Cassation - families, relatives

An element of the judiciary is corruption.

Among prosecutors, 33% told a lawyer openly about informal talks to clarify the amount of the bribe.

Judicial officers sought 43% seeking benefits with the help of lawyers.

In 78% of cases, lawyers received hints of money and services.

99% of the lawyers are aware of the schemes with the mechanisms, the ways of the corrupt practice.

In examinations and anonymous examinations, how many and in what way and how often do judges take bribes, regardless of the amount and type of results:

- Very often - 13%
- Often - 16.8%
- Not very often - 13.2%
- Rarely - 16.4%
- Never - 3%
-

- The practice of offering high-value cracks - or a gift.

The corrupt practice of judges in cases filed against Banking institutions, insurance companies, financial companies offering fast loans - corruption is almost 99.9%. Decisions are made in violation of practical directives of the European Commission,

There is protection for judges at all levels in cases brought against Baku and financial institutions

There is protection of judges at all levels in cases filed against actions of persons from the Ministry of Interior, various state institutions.

There are courts that decide professionally on cases filed against the Council of Ministers, ministries, the National Revenue Agency and other institutions - the ADMINISTRATIVE COURTS.

The chairmen of the administrative courts are appointed by the protections of the executive power - the prime minister. The former chairman of the Supreme Administrative Court G. Kolev is close to the Prime Minister of the Republic of Bulgaria - Boyko Borissov.

Corruption practices in the courts: deliberate distribution of judges in court cases.

Examples of high-level corruption - Deputy Chairman of the Supreme Court of Cassation Vlahov issued an order appointing judges to hear cases without using the random distribution of court cases.

POSTPONEMENT OF CASES

VIOLATION OF LAWS in court cases in favor of the MAFIA and persons and companies belonging to the mafia.

THE PRACTICE to issue insane acts in violation of any laws.

PRACTICE of judges belonging to the mafia is to issue such acts with such arguments and motives, completely insane, using the veiling of motives, meaningless philologization of legal norms, creation of PERSONAL CPC by judges - in violation of CPC.

PROCEDURES FOR LEGALIZATION OF MAFIA ORDERS IN COURT AND PROSECUTOR'S OFFICE, COUNTRY

The procedure by which the relevant order from the mafia for theft of property, factory, company, etc. is legalized is the following:

1. In case of a lawsuit - through the court. In the first instance, a decision is made in favor of the contract, even if it is absurd, a super-petition - the legal grounds are changed, indisputable evidence is not treated, indisputable evidence is treated deliberately, indisputable evidence is not treated at all, false testimony is treated indications. The relevant decision is upheld at second instance. The decision of the second instance is upheld at the third instance - the Supreme Court of Cassation. Everything is legal.

2. Upon a complaint to the prosecutor's office. At first instance, the prosecutor's office does not even consider evidence at all, but writes a link decree for refusal of formation, although there is indisputable evidence of fraud, theft, possession on a particularly large scale, use of documents with false content, preparation of documents with incorrect content - notarial deeds and others. It is confirmed at second instance. At the third instance, the Supreme Cassation Prosecutor's Office confirmed the second instance.

3. In the country. Adoption of a law to legalize theft, crime, fraud. Last concrete example. The amnesty law on crimes committed by civil servants and others - ministers and others.

Examples of the mafia in the judiciary are some of the following: - a judge from the Sofia City Court goes to his colleague a judge from the SRS, with whom they worked in an office in the SRS and carries a civil or criminal case and states who his people are - be it the plaintiff or the defendant, - Judge of SRS instructs a judge of SRS criminal college to bring a completely healthy person into the insane asylum, - Chairman of SRS despite the application of indisputable evidence of violations of a judge of SRS does not comply with the Judiciary Act and does not take any measures for punishment or dismissal of a guilty judge, - President of a court orders judges from the court entrusted to him to terminate cases conducted by a group of people, companies or other or the respective plaintiffs to lose them - the decision of judges who executed the order and issuing a court decision i.e. complete absurdity, -President of the Supreme Court despite the attached evidence of mafia and crimes committed by judges of his court does not take any action to fulfill its legal obligations to dismiss guilty judges, -President of the Supreme Court executes an order of the executive with the region In order for a company to lose a case for tens of millions of leva, - The President of the Supreme Court, although they attach evidence of crimes to him, how his subordinate judges "legally" steal property from their real owners and donate it to a third party for zero pennies, does not take any action. actions, -The President of a court orders a criminal judge to convict an innocent citizen, -The President of a court orders and actually commits crimes in favor of a large company, -The President of a court commits himself to losing cases against a municipality to injured plaintiffs, The President of the Court is committed to the execution of orders of the executive branch and to actually suffer damages - President of the court committed himself to banking institutions, insurance companies suffered to lose cases against the institutions, - President of the court committed a completely absurd decision of the first instance to be confirmed by judges of his second instance, -President of the Supreme Court conceals committed crimes by his subordinate judges, as they have made orders, -President of the Supreme Court conceals crimes committed by his subordinate judges ruled in favor of the mafia and a militant group against a victim of theft, -President of the Supreme Court despite his specialization in criminal law conceals crimes committed by his subordinate judges.

AREAS OF DISTRIBUTION OF INJUSTICE

Injustice can be detected in court, prosecutor's office, state, ministers, executive institutions, regulatory bodies, controlling bodies, bodies protecting and controlling the rights and freedoms of citizens, personal data, discrimination, executive services.

They depend on the mafiaization of a society, on practices, traditions, political and economic development, the specifics of a society, the socio-cultural environment, laws, morals, rules, norms, morals and ethics of behavior of citizens, judges, prosecutors, statesmen, employees and others.

Areas of manifestation of corruption are:

1. The sphere of state administration. This includes government, government departments, and institutions, local governments, and others.
2. The sphere of politics-. This includes parliament, political parties, trade unions, movements, business and non-profit associations. Adoption of laws that are unconstitutional and the basic law protecting rights.
3. The sphere of the judicial system / judges / prosecutors / investigators
4. The sphere of law enforcement institutions / prosecutor's office, investigation services, police /
5. The sphere of public services - healthcare, education, social assistance and others.

11. When government or other types of employees have important inside information and do not comply with the law, do not apply the law, violate the law in someone's private interests
12. When there is non-transparency in decision-making and implementation of a decision or choice of decision.

JUSTICE / INJUSTICE IN THE JUDICIAL SYSTEM

The monopoly on the judiciary and the maintenance of public order is the most important prerequisite for the generation of corrupt practices in the judiciary and the police.

An important factor is the inaccuracy, incompleteness, the presence of gaps in the relevant laws, regulations, procedures, deadlines, inconsistency of laws, inaccuracy of procedures, violation of procedures and deadlines in the judiciary, the feeling of impunity by magistrates, police, prosecutors, investigators.

Corruption in the judiciary and the police is the most important factor in the spread, imposition, growth of corruption throughout the public sector.

It generates a sense of impunity for corrupt officials, a sense of injustice among the oppressed, a sense of a double standard of laws for different segments and groups of people.

THE SPECIFICITY OF JUSTICE / CORRUPTION IN THE JUDICIAL SYSTEM

1. The monopoly of knowledge and skills.
2. Existence of omissions, inconsistencies between different laws.
3. Failure to comply with deadlines and procedures in court proceedings.
4. Personnel crisis in the judiciary. The promotion of junior judges, relatives of senior judges, prosecutors known to senior judges and prosecutors, etc.
5. Crisis in the objective appointment and promotion of judges, prosecutors, investigators. There is political influence here, as well as influence from the executive branch.
6. Simultaneous action of incompatible legal norms
7. Existence of a practical lack of responsibility and responsibility for poorly done work, for an illegal decision.
8. Lack of clear rules for assessing the professional qualities of employees.
9. Lack of professional traditions.
10. Lack of limitation of competencies.

Other areas of corruption - in politics, the economy and the public sector - will not be addressed in this report.

MORALS AND DEGREE OF MORALS

Morality is the distinction between intentions, decisions, and actions against those that are good and right and those that are wrong and bad. Morality is an essential part of the standards and principles that are derived from the guild's code of ethics in a democratic society.

Degree of Morality - "honesty", "integrity", "justice", "kindness", "rightness".

However, moral norms and principles in a democracy are uniform, although there are different moral systems.

After the law, morality is the second source of law in countries that have adopted the continental legal system. If such a morality with the respective qualities is missing, then there is no right and the law is not realized, is not realized, and is not fulfilled.

Ethics, on the other hand, is a branch of philosophy that deals with moral issues. Ethics includes and encompasses the moral principles of a society, culture, person, group.

Morality is limited as a system of duty, obligation, principles of conduct, justice.

On the other hand, morality contains a value system. This value system is a set of ethical values of a person, organization, society, group, which represent a standard for human behavior in all situations - group, family, society.

Public values, value system of judges, prosecutors, states

Four categories of value systems must be distinguished:

- Personal value system
- Spiritual value system public values
- Career value system
- Family value system
- Cultural value system
- Social value system

-

- Only some social value systems materialize in the form of legal codes and / or laws.

According to the Constitution, Art. 4 The Republic of Bulgaria is a state governed by the rule of law and is governed by the Constitution and the laws of the country and "guarantees the rights of the individual".

According to Art. 117/1 / the judiciary protects the rights and legitimate interests of the person.

The individual rights of all people, including their legitimate interests, are also guaranteed.

However, this book proves the exact opposite - it is the people of the law who do not obey the Constitution, do not obey the laws, do not obey the laws, do not apply the laws, do not follow the laws, write to each other what they want in their country.

This all applies to representatives of the judiciary such as judges, prosecutors, investigators, statesmen, administration and others.

DEMOCRACY IS RELATED TO JUSTICE.

5. Princess Lady Prof. Mariola Garibova-Dobрева's and Prince Lord Prof. Momtchil DOбrev-

Halachev's THEORY OF SOCIO-HUMANISM – basics principals and Direct democracy IN ALL AREAS AND AT ALL LEVELS

1. At the center of this society, created on the basis of THEORY YANA SOCIO-HUMANISM of Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobрева, is man and the environment in which he lives, which is part of him and inextricably linked to him.

Human life and its value and its guarantee.

Guarantee of life - every person is guaranteed security of basic necessities of life, including, wound, housing, health care, medical care, education, social security.

The scientific, production and technological activity of the society must be directed mostly and only to the improvement of the quality of human life in the respective ecological environment.

Politics and economics must ensure economic stability, no inflation, any crises, stable, equal, comparable prices around the world, a fixed minimum taxation, a stable currency that is independent of inflation, crises, etc., and the corresponding rate of return for the respective goods, which is the basis of governance in a society.

This is the highest value, the goal of a society is to preserve and guarantee and ensure the value life of every person. There is nothing more precious than human life,

2 . Human rights and freedoms

All human beings are born free and with the same rights as human beings. Everyone has the right to choose, everyone has rights and freedoms, and society must protect these rights and freedoms of all citizens. These rights and freedoms are for everyone and not for certain classes, groups of people. No one has the right to take away people's rights and freedoms. No one has the right to threaten these rights and freedoms with his decision - be it government, community and others. This includes the fundamental right to political equality, not only in other respects.

3 . Human security and safety

No one has the right to threaten man and his security, no one has the right to threaten man and his rights and freedoms. The system and society must protect it.

4 . UNIFORM WORLD SERVICE FOR GUARANTEE OF PEACE, fight against emergencies. Representatives of such countries as the United States, China, Russia, Germany, Great Britain, France will take part in this council, which will guarantee and ensure peace on the planet.

5 . There is generally available information for everyone about everything that is available in society.

Everyone should have the opportunity and access to receive full information about everything - about society, about policies, about the budget, about the funds spent, about public projects, about investments in society, about movement, the distribution of public goods, the distribution of public goods. public money. Everyone should have access to all the information about how the decisions of the society, the tasks, the plans of the society are implemented.

Independence of the media - mandatory presence of public media to provide such access and to provide complete information to the public.

6 . System of development of human creative abilities and their satisfaction

Society to man, for his development and existence in the spiritual and any other sphere in the respective ecological system, which is connected in the system man, nature, planet.

Society to man, his development and existence, in full, spiritual plan, material plan, social plan, ecological plan

The ideology - the system must be to create conditions for the care of man, for his development - both spiritual and material, spiritual, social, environmental sphere, to meet all his needs from the Maslow pyramid fully and comprehensively.

The main priority of the SOCIETY BASED ON THE THEORY OF SOCIO-HUMANISM is the development of man, his spirituality, respectively his development in the professional sphere, in the spiritual sphere, development of his abilities, discovery of his personal abilities, development of these abilities, their manifestation in society.

Raising a high pedestal of moral, ethical values of man, spiritual and moral aspirations and desires of man, humanity, mutual respect, self-esteem, development of human relationships.

Education of man in the moral and ethical values of society, stimulation of the moral and ethical values of every person

Creating conditions for the inclusion of the individual in and with society, and for the development of the individual

Everyone in this society has the right, opportunity, access and freedom to develop, to develop their abilities, has the right to development and self-realization, Creating conditions for the development of creative abilities and gifts of man at any age.

Raising a pedestal of human spiritual development.

Education should not only be accessible to all, possible for all, and free and equal, but such education should be for the person throughout his life.

Education after secondary education, education among higher education, education after 25 years to his pigsty in which to allow a person to develop, develop and discover his new abilities creatively, and to support such development and realization by society.

Society guarantees and creates conditions for the realization of human creativity in every field.

7. Justice, Equality.,

All natural resources belong to society and man in particular. They are public goods. And they must be distributed equally among all members of a society.

Any monopolization of resources is excluded, and any kind of irrational anti-human anti-social use of these resources is excluded.

Resources are distributed fairly among all members of the community.

Everyone is guaranteed employment at his or her request. Wages are the same in every society for the same specialty, profession, position, qualification,

Everyone has the right to private property and income, as well as from an activity corresponding to his activity.

This society guarantees justice in society at all levels of the organization of society.

le this society guarantees full justice and solves the problems of justice / injustice described in the previous chapter.

8. Referendum democracy system

Citizenship . Everyone has the right to participate in the government of the respective state and society, to participate in the respective adoption of laws, for the improvement of people's lives, for the implementation of laws, for the adoption of the respective budgets for realization of goals, plans, for adoption of plans for development in all spheres of society.

The solution of all tasks concerning society, in the social sphere, in the ecological sphere, in the economic sphere, and in all other spheres will be considered by referendums, which may be attended by appropriately educated people who will have a minimum level of education.

9. Labor system. Everyone has the right to work and to work. He works depending on qualification, specialization, profession, experience. In the system of the society based on the Theory of Socio-Humanism of Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobрева, each person will have the right to work 3 days a week, and in the other two days of the week he must develop, participate in various courses for retraining, for development, for training in specialties and subjects that interest him and develop his creative abilities.

Every two days a week, each person must deal with their personal development in various specialties, professions, creative abilities.

If someone does not want to work, he will be provided, he will be guaranteed medicine, health care, education, social activities in the minimum amount, but there will be a requirement to train, develop and discover their other abilities, which may possibly are realized at a later stage.

10. The economic system in the Society based on the Theory of Socio-Humanism of Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobрева

Apart from the fact that in every country there must be a direct democracy and a system of drawing lots for professional positions, control at any level, control in every field and every ministry that is specialized. The control will be carried out by councils on a rotating basis by qualified specialists with the respective status - selected by lot from the citizens. The control will be performed regarding the activities performed under the respective plan - programs, and control of the respective budget of the respective activity.

In the Economy, all companies that provide basic resources - such as electricity, water, electricity, gas, oil, gasoline, other raw materials - must be state-run companies. Companies producing basic foodstuffs and foodstuffs must be state-run companies, which will be managed by the relevant ministry at the rate of profit.

THE PROFIT RATE INDICATOR will determine the limits of the prices of goods on the market, which will ensure fairness of the prices of goods necessary for human existence.

It will be possible to form joint companies in public-private partnership, which will deal with innovations and whose products will benefit the people and the whole society, as the state will determine the rate of profit of the respective manufactured goods and services.

IMPLEMENTATION OF NEW FORMS OF HUMAN RELATIONSHIPS IS IMPORTANT.

EIGHT FUNDAMENTALS OF THE CREATIVE SOCIETY.

ERADICATION OF CRIME.

There is crime where there are conditions for such and its existence.

le these are opportunities that are available from the conditions that cause and generate crime.

Crime is present where there is a need for something, a shortcoming.

If a person has everything, no need, no social protection, then he would never commit a crime.

He really has everything he needs.

When the minimum need of the person is the one available to him, it arises naturally if there are conditions in the person himself for the need to commit a crime.

Therefore, when society satisfies and satisfies all human needs

This is also related to education, healthcare, social system.

THE SYSTEM OF DIRECT DEMOCRACY - THROUGH REFERENDUMS

The current system of government is not a democracy at all, as it is not a real democracy, but rather an aristocratic mafia oligarchy of the global Masonic mafia elite and its deep rule in the deep state.

The mechanism underlying this sham democracy is elections. Elections are elected on the basis of citizens' votes.

These representatives, in turn, elect their proxies and representatives in the executive branch.

History proves that these representatives represent an elite that is mafia-like, corrupt, that looks only at its own personal interests and, if it enters the relevant parliament, forgets about its promises, and aims and carries out activities that only bring it millions of profits.

le this elite becomes an aristocratic oligarchy, which really represents and ultimately protects the interests of themselves and the few who give money and bribes, lobby with money and funds, property and others.

In the current "democracies", a voting procedure has been adopted and chosen.

Really so far. In reality, companies and banks finance both countries in one election - for example, in the United States and the two candidates of the two major parties, and whoever wins after that will work for them again.

The current systems cannot be democracies because of the electoral systems and the established system of the global Masonic mafia elite to falsify elections.

With the establishment of this type of government in the late 18th century in Britain, then in the United States, and in France after 1789. its creators knew that this had nothing to do with democracy a.

They had no real intention of creating a demonstration.

All these systems were created by a Masonic mafia elite and the deep government and deep state ruled by it.

For this Masonic mafia elite, the creation of democracy was really the creation of anarchy, and the rule of the common people. .

Thus, they create government through representation, which has nothing to do with democracy.

They really wanted to end the rule of the aristocracy and replace it with their mafia-style system of government in which they would rule, to draw on the goods.

In reality, democracy is translated as "democracy", and that state power comes from the people for the benefit of the people and is divided into:

- Consensus democracy
- Referendum direct democracy
- Representative democracy through elected representatives

By people is meant the citizens.

Essential characteristics of democracy are equality and freedom.

Equality of all citizens in the law and equal access to power.

The freedom of citizens is ensured through established rights and freedoms in relevant laws.

In a representative democracy, all votes have equal weight, but in reality the ability of citizens to become representatives is limited, their ability to come to power is limited.

In reality, however, there is no real political equality in the current systems.

Equality in representative government is only fictitious, formal, imaginary.

It was clear to the founders of democracy that no one would be overthrown by voting, and that the poor would never take power by voting in elections.

Just because elections are a form of falsification of free choice.

That is why it is convenient for all this global Masonic mafia elite to call this "democracy", which, however, has nothing to do with democracy.

A caste of politicians is being created.

BASIC PRINCIPLES OF DEMOCRACY ARE:

The main element that shows the existence of a DEMOCRACY is the TRUE POLITICAL EQUALITY OF THE CITIZENS, which does not really exist at the moment.

Not socially, economically, physically, culturally, ethnically, etc. and POLITICAL EQUALITY - EQUALITY IN POLITICAL DECISION-MAKING.

In reality, decisions in a true democracy must be made collectively, through a general assembly of the people and not through its elected representatives.

The Assembly is such a form of general assembly of citizens.

The misuse of the word democracy has really devalued it.

In reality, power is corrupted by this elite, because its value system is not the one guided by morality, honor, dignity, conscience.

The current type of social system, social system, economic system constantly causes crises in every sphere of human activity.

The constantly created and deliberately provoked crises in international relations, politics, economics, education, healthcare are rooted in the main forms of market economy - personal interest and the constant pursuit of ever-increasing profits.

There is a system of organization and management of people's lives from the outside, and they cannot have any control and influence over those who govern their lives. This system is full of contradictions that provoke crises that are actually caused by the global Masonic mafia elite and its led and managed deep government and deep state. People's opinion is ignored, not taken into account, people's interests are violated, public goods are looted, and go to the management of private interests, under the pretext that man can not manage well state-owned companies, property, goods.

On the other hand, egoism, egocentrism, the pursuit of success at any cost and success that brings only profits, income, contribution of money, while ignoring the development of human creative and spiritual abilities, come to the fore.

Only such behavior and value system is tolerated, which leads to profits for certain individuals, companies, for certain interests, political elite, global Masonic mafia elite.

It turns out that a system of government with a high vertical structure and a hierarchical pyramid system of government increasingly ignores the interests of society and people, deletes them, replaces them with their own personal interests for profit.

On the other hand, the creative abilities of the person are suppressed, which does not necessarily bring profit, money, dividends and others.

Such abilities are rejected, ignored.

Apart from the fact that the hierarchical system of government, the vertical structure ceases to serve society and people, it at one point uses all kinds of coercive forms and measures against the people themselves.

"The forms of 'democracy' that we know so far, and which are based on the election of representatives to elect their representatives in power and in vertical hierarchical structures and organization, have nothing to do not only with direct democracy but also with democracy.

The elected representatives elect their representatives, and the control, accountability, responsibility, dependence of the respective representative of the representatives on the choice of the citizens is actually lost.

This is an imaginary democracy.

An alternative to the current democracy is direct democracy.

They build institutions that ensure that every member of society can participate directly in decision-making at the political, economic, social, environmental, cultural and all levels.

Capitalism generates a consumer society whose value system is quite low, whose value system satisfies only the lowest human needs of Maslow's pyramid, where the most important are the ego, money, profit in money.

The direct democracy of the Theory of SOCIO-HUMANISM places man and the whole system in which man lives environment, ecological environment - planet, plants, animals, people at the center of this system.

The impact of these decisions on both the social system and the ecological system of the planet is always considered in decision-making.

In addition, the system of direct democracy of SOCIO-HUMANISM imposes on the one hand referendums on the choice of:

Program plan for a specific period. These plans-programs concern - public life, economy, social system, healthcare, education, internal and external security, external political and economic and international relations, the innovation system, the system of establishing state and / or state / private partnerships.

Need to change laws, create new laws.

Budgets for the implementation of these plans - programs for a specific period.

On a rotating basis, qualified personnel are selected by lot to implement and implement these plan-programs, and these qualified personnel have precisely defined for this position capacity, knowledge, experience, experience, achievements and others. As the choice of these shots is for a specific time. For this period of time, these frames are reported before the period during the period, at the end of the period and after the period.

These qualified staff have SHORT AND NON-RENEWABLE TERMS - the powers must be given for a short period. One-time and short terms.

EQUALITY - POLITICAL, SOCIAL, SOCIAL IS THE CORE OF DEMOCRACY AND ITS SINGLE CONDITION.

Because power corrupts, ie. those in office will not have the opportunity to corrupt themselves.

CONTROL of the implementation of these adopted plan programs in each area.

The control is from every citizen, constant access to the information about the plan-programs, their implementation.

CONTROL - before the term, during the term, at the end of the term, after the term.

CONTINUOUS ACCOUNTING

SANCTIONS - recall,

CONTROL LEVERS FOR RESPONSE TO

INSTITUTIONS OF DIRECT DEMOCRACY

The institutions are organized on a non-hierarchical basis.

The political, economic, social, ecological system are organized on the principle of self-government, control by citizens, accountability to citizens at any time, appropriate system of acceptance of these actions, sanction of actions that do not lead to the respective results, responsiveness of management staff.

THE JUDICIAL SYSTEM

Election of the Chief Prosecutor, city, district prosecutors on the basis of referendums cover the relevant criteria and propose the relevant plan-programs

Control, reporting, t responsiveness

INSTITUTIONS OF DIRECT DEMOCRACY

All systems are an arrogant of the system of self-government, and control by civil society of accountability to civil society of the period, respectively a system of sanctions and recall.

On non-hierarchy

Direct democracy is applied in every sphere of the public, political, economic, ecological, social, cultural life of the citizens.

Equality of rights - half-sect equality

An additional institution of political equality is the RIGHT TO FREE SPEECH.

In reality, the right to free speech enables every citizen to be a guardian of the public good, the public domain.

ie THE RIGHT TO TAKE THE WORD AND THE RIGHT TO SPEAK IS A BASIC PRINCIPLE IN DIRECT DEMOCRACY.

EVERYONE HAS THE RIGHT TO TAKE THE WORD AT ANY TIME, ON ANY ISSUE.

Everyone can talk.

Purity of democracy

It is also the right to tell the truth, to expose the lie, without having any consequences for the perpetrator.

This is the category - it makes citizens active, responsible for what they say, say. As well as the fact that these opinions expressed and others are important for the relevant institutions.

This helps citizens to be active in the whole process.

The possibility for citizens to be passive, whether out of fear, threats, or other racketeering, coercion, to tell the truth, must be destroyed.

Capitalism is just the opposite and opposite of democracy.

Under capitalism, there is a concentration of capital, human and natural resources in the hands of a small group of people, the so-called global Masonic mafia elite.

The real "democracy" at the moment is the one that belongs and serves the market of the owners of huge capitals, finances and others - the global Muscovite mafia elite - including Rothschild, Rockefeller, Morgan, Soros, Bull Gates and families of the black aristocracy and 13 families ruling the world-.

The capitalist system rests and survives only on this concentration of wealth, money and power.

All their companies have the power to do business that brings huge profits to them.

The lack of democracy also leads to the environmental problems and ecological crisis created by this global Masonic mafia elite.

ie in SOCIO-HUMANISM the main task is to cover the interests of man, of the ecological system, and of all its inhabitants,

ENVIRONMENTAL SOLUTIONS CLIMATE CRISES AND SOLUTIONS require democracy.

SYSTEM OF DIRECT DEMOCRACY AND CONTROL OF THE JUDICIAL SYSTEM

We have proved beyond doubt the mafia and corruption in the judiciary around the world. The oligarchy and the global Masonic mafia elite rule not only the states, their government, finances, capital, create all kinds of crises, we will not list them, but also the judiciary.

By mafiotizing the judiciary, this global mafiaized Masonic elite legitimizes theft of assets, capital, companies, repression, racketeering, theft, legalizing crimes committed by them.

The system of direct democracy and control of the judiciary in the Society created on the basis of the Theory of SOCIO-HUMANISM is the following:

1. With precise, clear criteria for experience, practice, experience, assessments, specializations when applying, junior judges are selected by respectively established citizens' councils on a rotating basis for a period of 2 / two / years, and the age cannot and should not be younger. for 30 years. To hold experience in law and legal sciences not less than 5-7 years. This is the election of junior judges at the district court level

2. The Citizens' Council exercises continuous control during this two-year period of court cases, acts, in connection with precisely defined ethical and moral and professional rules of conduct of junior judges. In case of violation - sanction - system of sanctions.

3. Citizens' councils are elected on a rotating basis by professional lawyers for a term of one year.

4. City and district judges are elected by referendum, based on a program presented to the respective candidate, who meets specific conditions - professional, internship, experience, and others. These judges are

elected for a term of 2 / two / years. They have no immunity. Control of the actions by a civil commission elected on a rotating basis for 1 / one / year.

5. The heads of all courts are elected in referendums by the civil society from the respective district - city, district, in defense and presentation of a respective program by the candidate. Control of the actions of the respective head by a civil commission.

6. The heads of the supreme courts are elected by referendums from the entire population.

The heads of the courts of appeal shall be elected by referendum in the district concerned.

7. The chief prosecutor is elected by the entire population in a referendum, after presenting the horn.

Control is carried out by the relevant civil law council, which is on a rotating basis for one year, and its members deal only with this at all times, have no right to advocate, provide services, consultations and more.

Prosecutors at the appropriate levels are elected on the same principles above.

SYSTEM OF DIRECT DEMOCRACY AND CONTROL OF THE LEGISLATIVE SYSTEM THE JUDICIAL SYSTEM
