

# President PUTIN of RUSSIA Begins Dismantling the Global Neoliberal Capitalism and the Financial Matrix of the Deep Mafia and Hegemony of the United States after the Declared Economic Sanctions War against Russia and if He Sells Raw Materials for Gold He Will Bankrupt the West and the United States

Prince Lord Prof. Momtchil Dobrev<sup>1</sup>, Princess Prof. Mariola Garibova-Dobрева<sup>2</sup>

*Scientific Research Institute Dobrev & Halachev JSC.*

**Abstract:** The start of the Ukraine-Russia military conflict has led to Western sanctions against Russia, which has led to countermeasures against Russia over its exports of all kinds of raw materials, which has opened Russia's door to dismantling global neoliberal capitalism and financial matrix of the deep mafia.

**Key words:** War, Economics, Politics, Finance

---

## 1. Introduction

February 21 and the document 2022 we are witnessing the conduct of a specialized military operation in Russia on the territory of Ukraine. This article examines the results of the economic sanctions war in the West, the United States, and its allies, Russia's anti-sanctions against these sanctions, and the shaking of the financial system of global neoliberal capitalism and the financial matrix of the dollar.

Facts and evidence in this direction are analyzed and conclusions are drawn about the consequences of the sanction of the sanctioning economic war and Russia's countermeasures for US hegemony.

## 2. Research methods

Research methods, analysis, information on the occurrence of sanctions, measures, countermeasures, sanctions from the United States, the European Commission, the consequences, the interests of NATO, European countries, and the deep mafia.

## 3. THE FINANCIAL SYSTEM OF THE DEEP MAFIA RESTS ON THE THREE PILLARS:

World Financial System - International Monetary Fund, World Bank, Federal Reserve as Head and SWIFT, all central banks, European Central Bank, the other central banks who is leading from USA, IMF WB, the stock exchanges

- Military industrial complex

- Petrodollars and oil and drug dollars as coverage of the dollar.

Everything is collapsing right now.

In this article we will look at how rising resource prices have affected the financial system against the dollar and the deep mafia and caused irreversible shocks and changes that lead to the conclusion of the end of US and dollar hegemony in the world financial system, globalization and neoliberal governance. and international trade.

#### **4. THE SANCTIONAL ECONOMIC WAR OF EUROPE The United States, NATO, Britain, Canada, and other countries include the following elements**

##### **ELEMENTS OF THE SANCTIONAL ECONOMIC WAR**

- 1 /. IMPOSING continuously on the stages of SANCTIONS of the Spiral Centrifuge system in all areas of life in Russia, economy, production, export of oil, gas, coal, mineral fertilizers, metals, palladium, nickel, aluminum and others, import, embargo on raw materials, export of goods, import of goods and services
- 2 /. Search for reasons for NATO intervention
- 3 /. Conducting total information cyber warfare, spreading lies,
- 4 /. Creating and organizing a system of provocations, occasions,
- 5 /. Supply of weapons to Ukraine from all sanctioning countries, especially the United States, Canada, Britain, Germany, France, Italy and all EU countries.
- 6 /. Admission of anti-Russian propaganda by President Zelensky to all states, parliaments.
- 7 /. Creating a system of pressure on Russia from all sides and on any occasion
- 8 /. Pressure against third countries not to be neutral and not to support Russia =
- 9 /. Threats of sanctions against third countries should not be neutral
- 10 /. Prohibition of Russian culture, books, music, concerts, films, screenings, dismissal of Russian cultural artists, persecution of Russian cultural artists appearing in the West, USA, UK -
- 11 /. Organization of hysteria in every respect - information,
- 12 /. Organization and total anti-Russian propaganda with fake news in over 160 media outlets around the world in all languages.
- 13 /. Organization of provocations with torture, murders - the killed appear 4 days after leaving the Russian troops, forgery,
- 14 /. Organizing and filming provocations with extras, artists and others,
- 15 /. System of staging the dead, killed on Snake Island - surrendered, repression, rape, provocations
- 16 /. Leaving Western companies from Russia - all kinds of products
- 17 /. Pressure on Western companies to leave Russia
- 18 /. Pressure on Western investors
- 19 /. Pressure on oligarchs through the confiscation of their companies, real estate, yachts, to organize pressure to overthrow Putin.
- 20 /. Conducting an information war to instill a negative opinion in the Russians against Putin.
- 21 /. Threats against Putin for murder, for trial, for criminal trial, calling him by epithets
- 22 /. Sanctions against Putin's relatives, threats against them.

THE SANCTIONAL ECONOMIC WAR led by the United States, the European Commission, Great Britain, Canada, and Australia is targeting the following industries:

Trade, Finance, Investment, Consumption, Raw Materials, Production, Politics, Transport, Supplies, Tourism, Culture,, Sport, Life, Propaganda, Media,

Aim for failure, problems, deficit,

SEPARATE US EC, UK CANADA, looking for:

- Reasons
- Provocations
- Simulation of
- Falsification

- Deception
- Staging

#### AT THE SAME TIME TOTAL INFORMATION CYBER WAR

- Lack of objective information
- Attenuation of objective information
- Total propaganda using false information
- Total falsification of data and facts
- Scenarios with Total Lies
- Screenplays and films of stage workers - film productions of fake events
- Total propaganda with over 160 media outlets worldwide
- Total staging, fake, filming with extras, artists,
- Total propaganda for false repression
- Total propaganda for provocations - mostly from the Ukrainian troops
- TOTAL CONTROL OF THE MEDIA - TELEVISION, INTERNET, NEWSPAPERS, MAGAZINES,
- Fake photos - mostly from Syria, not from Ukraine and other regions and regions

#### SYSTEM OF PROVOCATIONS

"Through a third party."

- Use of reins - sending drones
  - Strikes against apartment blocks, buildings, schools, kindergartens and then attributed to the Russian military
  - Strikes against administrative buildings, hospitals, maternity hospitals and then attributed to the Russian military
  - The use of chemical and biological weapons is also expected and then attributed to the Russian military
  - Sending drones - for example to Croatia and then attributing to the Russian military
  - Killing civilians and then attributing them to Russian troops
  - Attributing to Russian troops that they used vacuum bombs
  - Attributing to the Russian troops that
- Staging, fake reports, movies, statements,  
Fascist photos

#### SYSTEM OF TOTAL HYSTERIA AND FALSIFICATION OF FACTS

THE SANCTIONS imposed by the United States, the European Union, and the United Kingdom use the SPIRAL CENTRIFUGE scheme, imposing even greater sanctions on all occasions in all areas, regardless of how they and their countries will be affected.

With this SPIRAL CENTRIFUGE, sanctions are constantly increasing in all areas and branches, even in culture, sports, education.

PRESSURE ON THIRD COUNTRIES NOT TO BE NEUTRAL AND NOT TO SUPPORT RUSSIA.

THREATS WITH SANCTIONS TO THIRD COUNTRIES NOT TO BE NEUTRAL, NOT TO SUPPORT RUSSIA

#### AT THE SAME TIME - IMPLEMENTATION OF

- Pressure from third parties
- Direct pressure
- Indirect pressure
- Sanctions from third countries

PROPAGANDA DIRECTLY FROM PRESIDENT ZELENSKI constantly calls for all kinds of sanctions, and this is the whole world, especially NATO, USA, Great Britain, Italy, Germany, the Netherlands, Poland, Bulgaria, Romania, Slovenia, Spain, Italy and other countries to supply Ukraine with military equipment. weapons, ammunition, drones, air defense, weapons.

OBJECTIVES OF SANCTIONS

- They aim to disrupt the current energy supplies from Russia to other countries
- Limiting economic growth
- Bankruptcy of enterprises of the Russian Federation
- Bankruptcy of banks owned by Russia and Russian oligarchs
- Blocking Russia's \$ 680 billion reserve
- Blocking Russia's gold reserves and blocking all payment options.
- Blocking the reserves of the Russian Central Bank in order to make it bankrupt in case of non-payment of debts and obligations on bonds
- Blocking the assets of Russian billionaires around the world
- Search for an opportunity to confiscate assets of Russian companies, both public and private companies
- Confiscation of property, yachts, planes, all kinds of assets, for example, and property of football clubs
- Setting the oligarchs against Putin
- Imposition of restrictions and bans on exports to Russian and Belarusian companies
- Challenging a lower standard
- Rising inflation
- Raising the interest rate
- Decrease in purchasing power
- Reduction of investments
- Reduction of production capacity
- Reducing the growth of the economy
- Low standard of living.
- Sanctions reach absurdity - ban on Russian authors such as Dostoevsky, Tolstoy, ban on Russian composers - Shostakovich, Tchaikovsky, ban and dismissal of Russian opera singers, conductors who do not support Ukraine, ban on Russian ballet dancers
- Prohibition on import of fuels oil, gas, mineral resources and others

#### THE REACTION OF PUTIN AND RUSSIA

Decree obliging buyers of gas and oil to pay in rubles not in euros or US dollars. The scheme is simple, buyers have to pay in rubles, ie. to buy rubles from the central bank of Russia, which will determine the appropriate rate.

Buying Russian rubles in euros or dollars or other currency will lead to an increase in Russia's reserves in other currencies.

The second major solution would be to get buyers of gas and oil if they do not want to buy rubles to pay in gold.

Russia's central bank will put the ruble at the gold standard. The bank has transferred 1 gram of gold to 5,000 rubles. Now this means that one troy ounce of gold or 32 grams of gold would now cost 160,000 rubles in Russia. At the current exchange rate, 32 grams of gold would cost roughly \$ 1,600 in Russia.

In the United States, the same amount of gold costs \$ 1,928. This will mean that Russia has increased the value of its currency against the dollar by turning it into gold.

Once 1 gram of gold is pegged to 5,000 rubles, it will mean that the ruble dollar is 70-75 rubles for one dollar

The EU buys oil and gas from Russia worth \$ 660 million a day.

Putin's decision to replace the dollar with the ruble means that the European Union will pay for gas and oil in rubles.

The Decree № 95 signed on 05.03.2022 for temporary fulfillment of the obligations to some foreign creditors. If you have a loan in a western bank / company from a country that has imposed sanctions, when paying a month more on the equivalent of 10 million rubles - or 86500 euros, you do not need to repay it in foreign currency. You turn to a narrow bank and ask it to open a correspondent bank account in rubles, in the name of the lender. In this case, the consent of the creditor is not required. You transfer rubles to this account and it is actually considered that you have repaid your loan.

Thus, about \$ 460 billion disappears from the balance sheets of Western banks, leading to a domino effect of bankruptcies and collapses. There is really nothing that can be done with these rubles.

This is a nuclear financial bomb.

This means that if we accept 1 dollar per 100 rubles, this means that the European Union must have at its disposal and save 66 billion rubles a day for oil and gas.

In this way, the European Union will be forced to buy rubles for dollars or euros from the Russian Central Bank. Russia and Putin if a new decision is made - the Central Bank of Russia to sell rubles for gold - this will cause HUGE LOSSES to the countries of the WEST, USA, UK.

In this case, the European Union must save 11 tonnes a day to buy 66 billion rubles a day to pay for oil and gas and coal imported from Russia.

If PUTIN makes that decision, it will bankrupt the EU and every country, or it will accumulate assets huge assets in gold and will withdraw gold from debtors.

The economic war against Russia has become a perfect weapon for Russia to bankrupt states, to cut off the entire system of the deep mafia.

THE KILLING FINANCIAL WEAPON - THE RUSSIAN CENTRAL BANK TO SELL RUBLES FOR GOLD, BECAUSE IT HAS A GOLD COATING

This will lead to the impoverishment of the West and the United States on gold reserves.

The consumption and supply of gas from Russia to each of the countries in Europe is as follows:

	Consumption Billions of cubic meters	Imports from Russia billions of cubic meters
Netherlands	48.1	36.6
Germany	86.5	41.6
Italy	67.7	20.9
Belarus	18.4	17.9
Turkey	46.4	16.4
France	40.7	14
Austria	10.6	8.5
Poland	21.6	9.7
Great Britain	72.5	8.9
Hungary	10.2	8.6
Slovakia	7.6	5.0
Czech Republic	8.5	4.0
Greece	5.7	3.1
Bulgaria	2.9	2.3
Croatia	2.9	1.6
Denmark	2.3	1.8
Finland	2.0	1.6
Latvia	1.6	1.1
Belgium	17.0	1.3
Romania	11.3	1.0
Lithuania	2.4	0.9
Spain	32.4	0.8
Switzerland	3.2	0.4
Slovenia	0.9	0.4
Estonia	0.4	0.3
Northern Macedonia	0.3	0.3
Ukraine	29.3	0
Portugal	6.0	0
Ireland	5.3	0
Norway	4.4	0

The European Union imposes sanctions on over 60 leading Russian companies - Sukhoi, Tupolev, Voenno Progress, Kalashnikov, Almaz-Ntey, Urolvstolzavod, Russian Railways, Kamaz, Sovcomflot, Sevmek

Symmetrical reaction - nationalization of Western assets in Russia.

Against politicians,

Against the extraction of oil, gas, ores, coal

Futures are up 60% in the Netherlands and 402% in Germany

Increase in the spot market by 6-9% of gas prices

Increase in prices of corn, soybeans and other crops by 10.12-16%

The United States is the largest producer of shale gas, the cost of production is high. As gas prices rise, US shale gas prices in Europe are becoming more competitive

The aim is to bankrupt EUROPE,

EUROPE imports 46% of coal, 42% of gas, 25% of oil imports from Russia.

The United States is seeking help from Qatar to replace gas supplies with liquefied natural gas to EUROPE.

QATAR refuses, as 97% of its liquefied gas production is long-term.

At the same time, the United States imports 46% more OIL than RUSSIA currently in February and March 2022.

The sanctions will lead to a decline in basic production throughout the West and the United States. The decline will be followed by fertilizers, which will lead to a decline in agricultural production will lead to famine.

The United States is lifting sanctions on imports of Russian mineral fertilizers, as it will starve the United States.

The United States equates Russian fertilizers with basic necessities in order to prevent blacklisting and the corresponding collapse of agricultural production, leading to hunger and demand and the need and demand for food that will be missing from the market.

The US Treasury Department has issued a new general license on March 24 that effectively removes possible sanctions on Russian mineral fertilizers.

As a result, births are rising

#### **COOPERATION BETWEEN RUSSIA, CHINA, IRAN, Saudi Arabia**

Saudi Arabia starts selling its oil for yuan

Saudi Arabia and China have signed a \$ 10 billion deal to build a Russian refinery to work with Russian oil in China.

Risa and China are finalizing the interbank payment system that bypasses SuiFG.

Russia banned exports of wheat, grain, fertilizers until August 2022, and Russia is its largest exporter - wheat 37 million tons per year.

Venezuela and Maduro have played on the US experience in oil supplies, in exchange for easing sanctions on Venezuela, as Venezuelan Petrov is as heavy as Russian and the United States imports 7-8% of Russian oil.

For the week of March 28, 2022 to April 3, 2022, the United States imported 43% more oil or 100,000 barrels per day more than Russia.

RUSSIA, CHINA and IRAN are a triangle of equal mutually beneficial partnership.

Gas supply from Russia to the following countries in Europe - Finland, Latvia, Lithuania, Estonia, Poland, Hungary, Romania, Bulgaria, Czech Republic, Slovakia, Germany, Netherlands, Belgium, France, Italy, Greece, Lovakia, UK, Spain, Portugal. the big ones are for germany, italy

Germany's economy depends on gas supplies from Russia. Germany has increased its gas consumption to 73 billion in 2014 to 86 billion in 2020

2013 Germany imports only 97 billion cubic meters, 2020 imports 155.5 billion cubic meters.

Germany needs 535 terawatts of electricity.

However, it generates only 484 terawatts

It makes the difference through imports.

Germany has no liquefied gas terminals.

Spain, France and the United Kingdom have 29 liquefied gas terminals in the EU,

In Europe 2020, Russia supplies 200 billion,

The United States supplies 76 billion cubic meters to Europe

Russia does not need diplomatic relations with the WEST.

Russia with retaliation against Britain - ban on flights of British aircraft owned by British legal entities and individuals,

Britain has suspended flights of Russian companies The ban also applies to transit flights.

Britain has imposed sanctions against Russian oligarchs, suspended access to trade in the country, real estate.

Great Britain, USA, EC excluded Russia from SWIFT - the main world network for international payments of the deep mafia, ie. it was the "atomic bomb" of financial sanctions. SWIFT is the main secure messaging system that banks use to make fast and secure cross-border payments. Currently, the network system is used by 11,000 financial institutions. It is a system of global finance of the deep mafia.

SWIFT is the main mechanism for financing international trade. Replacing transactions through other systems will make it more expensive and increase costs and create delays. This will be a shock to Russian companies, especially buyers of oil and natural resources,

Russia will direct payments through countries that have not imposed sanctions, such as China, which has set up its own payment system, China's payment system, and its own system, which Russia has built since the 2014 sanctions. to her ..

The ban on SWIFT will accelerate Russia's use of alternative payment systems Chinese SIRSL system

This will harm the US dollar

Russia has set up its own SRFS payment system following the 2014 sanctions. There are over 400 pickers in this system,

Excluding from SWIFT will cause harm to all parties - and the parties to it.

Russia is a huge buyer of goods from the Netherlands and Germany, Russia is a major supplier of crude oil, natural gas and solid fossil fuels, metals, coal, mineral fertilizers, palladium, nickel, aluminum, neon and other raw materials for industry.

European countries will find it difficult to find alternative suppliers.

Russia has a 17% debt to GDP ratio.

Russia has more than \$ 650 billion in foreign exchange reserves, which have been blocked by the United States, Britain, Canada and the European Union, a third of which is in gold.

The goal is to attack a NATO member.

Germany sends arms to Ukraine. Germany allows the Netherlands to send weapons to Ukraine. The purpose is to attack a member of NATO.

An occasion arises. Another false NATO action.

Hungary supports Russia's exclusion from SWIFT.

## **5. Putin's countermeasures against the declared SANCTIONAL ECONOMIC WAR by the United States, Britain, the European Union and their allies DESTROY THE FINANCIAL MATRIX of the petrodollar and the drug dollar of the deep mafia**

Undermining US financial stability

The system in The United States is waging war against Russia with its allies in Europe.

Russia's victory with the denationalization and demilitarization of Ukraine is if

THE INTERNAL PROBLEMS in the United States became so great, and the concentration of the American became from the outside in. This is after the rise in prices for oil, gas, coal, and raw materials exported from Russia to the United States.

There is an automatic response based on sanctions and measures taken by Putin against sanctions, led to an automatic increase in inflation from 6.7 to 7.45% in March 2022. This was followed by an automatic increase in prices for all products in the United States.

Ie THIS WAS THE RESULT OF THE LAW - THE INCREASE IN THE PRICES OF ENERGY RAW MATERIALS CAUSES PRESSURE BOTH ON CONSUMPTION AS WELL AS AGAINST ITS FINANCING.

This led to a loss of stability of the dollar, loss of hegemony of the dollar, shaking of the petro-dollar and drug-dollar fundamentals as a stabilizer of the financial system in the banking system.

After learning that oil from Russia began to be paid in yuan, rubles, but not in dollars, this led to a decrease in the value of the dollar.

This also affects direct investors in the United States, which further shakes the petro-dollar and the drug-dollar.

Direct investment in the United States is as follows - 14% Japan, Canada - 10.6%, UK - 10.5%, the Netherlands - 10.5%, Germany - 8.9, Luxembourg - 6.8%

Switzerland - 6.5%, France - 6.2%, Ireland - 5.2%

They ensure the stability of the dollar

1 /. Direct investment in the American economy

US allies account for 97% of US direct investment

China accounts for only 0.8% of the structure of direct investment

Neutral countries account for 15% of the structure of foreign investors in the United States,

These are China, India, Russia, Brazil, Mexico, Turkey.

The investment will not be able to be affected

AMERICAN FUNDS MARKET

Held by allies in Europe and Asia.

2 /. The stability of the dollar is ensured by the cash inflows on the stock market. It should be noted that as a result of sanctions against Russia and the beginning of Russia's special military operation in Ukraine, more than 490 billion dollars in assets were actually written off.

Europe provides 50% of non-residents, the rest are from Asia and North America

The United Kingdom, Canada, Japan, Ireland and Switzerland hold about \$ 6.3 trillion in shares traded on the US stock exchange.

3 trillion are offshore - the Cayman Islands and Luxembourg.

The US allies hold 80% of all securities in the structure of foreign investors, ie. \$ 22.6 trillion.

Non-sanctions against Russia represent only 4%

China in 2012 accounted for 12% of portfolio investment in the United States, in 2021 - already 5.65.

At the end of 2021 Russia withdrew entirely from long-term US government bonds, In 2011 Russia owned \$ 163 billion in treasury securities.

To weaken the United States first to weaken its allies.

This happened automatically after the sanctions imposed by the European Union and the United States. These sanctions have boomeranged all European countries, with all proceedings in all sectors collapsing, heading for closure and bankruptcy.

The very processes of Portfolio investment, equity investments, treasury securities, corporate bonds and bond bonds maintain the dollar's status as a reserve currency,

Russia has no direct levers of pressure.

BUT THE REAL INCREASE IN THE PRICES OF GAS, OIL, COAL, WHEAT, METALS, URANIUM, METALS has caused dust in US finances, which has caused inflation of 7.5% in March, and increased estimates of food prices. .

In reality, with US and European sanctions against Russia, the buffer hit EUROPE.

The United States is attracting financial flows from Europe to cover its own deficits, and the United States cannot survive without Europe. This is a chain reaction.

Excessive prices of raw materials and fuels nullify the current account of the EU, even to minus. This drains financial flows.

ie there will be no influx in the United States Financial ruin and economic ruin Europe will spread to the United States due to their integration.

## 5.1./ THE REACTION OF PUTIN AND RUSSIA

Decree obliging buyers of gas and oil to pay in rubles not in euros or US dollars. The scheme is simple, buyers have to pay in rolls, ie. to buy rubles from the central bank of Russia, which will determine the appropriate rate.

Buying Russian rubles in euros or dollars or other currency will lead to an increase in Russia's reserves in other currencies.

The second major solution would be to get buyers of gas and oil if they do not want to buy rubles to pay in gold.

Russia's central bank will put the ruble at the gold standard. The bank has transferred 1 gram of gold to 5,000 rubles. Now this means that one troy ounce of gold or 32 grams of gold would now cost 160,000 rubles in Russia. At the current exchange rate, 32 grams of gold would cost roughly \$ 1,600 in Russia.

In the United States, the same amount of gold costs \$ 1,928. This will mean that Russia has increased the value of its currency against the dollar by turning it into gold.

Once 1 gram of gold is pegged to 5,000 rubles, it will mean that the ruble dollar is 70-75 rubles for one dollar

The EU buys oil and gas from Russia worth \$ 660 million a day.

Putin's decision to replace the dollar with the ruble means that the European Union will pay for gas and oil in rubles.

The Decree № 95 signed on 05.03.2022 for temporary fulfillment of the obligations to some foreign creditors. If you have a loan in a western bank / company from a country that has imposed sanctions, when paying a month more on the equivalent of 10 million rubles - or 86500 euros, you do not need to repay it in foreign currency. You turn to a narrow bank and ask it to open a correspondent bank account in rubles, in the name of the lender. In this case, the consent of the creditor is not required. You transfer rubles to this account and it is actually considered that you have repaid your loan.

Thus, about \$ 460 billion disappears from the balance sheets of Western banks, leading to a domino effect of bankruptcies and collapses. There is really nothing that can be done with these rubles.

This is a nuclear financial bomb.

This means that if we accept 1 dollar per 100 rubles, this means that the European Union must have at its disposal and save 66 billion rubles a day for oil and gas.

In this way, the European Union will be forced to buy rubles for dollars or euros from the Russian Central Bank. Russia and Putin if a new decision is made - the Central Bank of Russia to sell rubles for gold - this will cause HUGE LOSSES to the countries of the WEST, USA, UK.

In this case, the European Union must save 11 tonnes a day to buy 66 billion rubles a day to pay for oil and gas and coal imported from Russia.

Russia has set up its own SRFS payment system following the 2014 sanctions. There are over 400 pickers in this system,

Excluding from SWIFT will cause harm to all parties - and the parties to it.

Russia is a huge buyer of goods from the Netherlands and Germany, Russia is a major supplier of crude oil, natural gas and solid fossil fuels, metals, coal, fertilizers, palladium, nickel, aluminum, neon and other raw materials for industry.

European countries will find it difficult to find alternative suppliers.

Russia has a 17% debt to GDP ratio.

Russia has more than \$ 650 billion in foreign exchange reserves, which have been blocked by the United States, Britain, Canada and the European Union, a third of which is in gold.

The goal is to attack a NATO member.

Germany sends arms to Ukraine. Germany allows the Netherlands to send weapons to Ukraine. The purpose is to attack a member of NATO.

An occasion arises. Another false NATO action.  
Hungary supports Russia's exclusion from SWIFT.

5.2./ RESULT FOR RUSSIA AFTER THE RELEVANT SANCTIONS which lead and prove the dismantling of global neoliberal capitalism and the financial matrix of the deep mafia through the dollar.

Russia is moving to its own financial system, independent of the IMF, with a gold-backed currency. Those countries that want to trade with Russia will pay in gold or in a currency backed by gold such as the ruble  
In this way, Russia is freed from the 5th column.

Neither Russia nor China needs the dollar anymore.

The creation of the new financial system begins, which excludes the United States and its dollar.

In reality, sanctions only apply if the dollar is used for payment.

If Russia withstands these sanctions a little longer, it will

0- Russia will get rid of the dictates of the dollar

1- Russia will sell goods for rubles, which are backed by gold, or only gold

2- Russia will emerge from the global neoliberalism it has been forced to join since 1991.

3- Russia will become very powerful if it implements another system of development and growth.

4- Russia will have the opportunity to develop its own production

5- Russia will achieve 10 percent growth per year

6- Russia will command not only the international trade in oil and gas, which Europe and the United States will have to pay in rubles covered in gold. Otherwise, these countries will be starving and suffering their citizens.

7- Russia will have great opportunities to develop and create its own economy.

8- Russia will run the food chain as it exports at least 37 million tonnes of grain each year, and together with Ukraine they export 30 percent of all wood exports worldwide, the same goes for corn and other crops.

9- Russia will manage the food chain as it is the largest producer of urea mineral fertilizers. It is no coincidence that the United States has not sanctioned Russian producers of mineral fertilizers.

10- Russia will also manage the production of electricity from nuclear power plants, as Russia is the largest exporter of enriched uranium for nuclear power plants.

11- Russia will export raw materials against currency - rubles that are backed by gold.

12- Russia will create a better social system in the country

13- Russia will create an ecological society.

14- Russia will manage the production of chips as Russia is the largest exporter of

15- Russia will close factories in Germany that produce cars

16- Russia will manage steel consumption, not the case the US does not impose sanctions on steel production

17- Russia is driving the rise in prices of sunflower, wheat whose largest exporters to Ukraine and Russia.

18- Russia raises cargo prices as countries close Russia's airspace,

19- Russia will manage the price of oil together with the other BRICS and Saudi Arabia countries,

20- Russia will manage the price of aluminum, which rose by 20 percent, palladium is palladium, which is extracted mostly in Russia rose by 26.7 percent, Wheat futures rose by 12 percent, the German company Leoni, which produced in Ukraine car components closed both factories and laid off 7,000 employees.

21- Volkswagen has stated that it cannot produce cable systems in Ukraine and will have to stop its factories in Zwickau, East Germany. There is the largest production of electric cars.

22- The plant in Dresden is closed,

23- Volkswagen will have to lay off 8,000 employees

24- 22 foreign companies such as the one just mentioned Leoni has 38 factories that produce components for the automotive industry.

25- Electronics, seats,

26- The lack of semiconductors has worsened. Semiconductor manufacturers in the United States import neon gas and palladium, all from Russia and Ukraine.

27- The Russian company MS Norilsk Nickel produces 40% of palladium in the world, produces 11% of world production of nickel

Russia also produces 4% of the world's cobalt, which is used in batteries, Russia produces 25 percent of the world's vanadium used in steel production, 3.5% of copper.

Russia and Ukraine export 30% of the world's wheat exports, 19% of maize exports, 80% of world exports of sunflower oil, All this is exported through Black Sea ports, which are currently blocked Ships with steel, iron can not be transported, Interruptions in supplies hinder local steel companies, The supply chain of iron ore pellets has been interrupted. Thus, the world's steel manufacturers Nippon Steel Corp. And the Austrian Foestalpin are looking for alternatives.

Last year, 300,000 containers were transported by rail from China to the European Union in the first six months of last year 2021.

Manufacturers of chips in the US curtain of Russian and Ukrainian materials such as neon, palladium in drigu. More than 90 percent of U.S. semiconductor supplies come from Ukraine, and 35 percent of US palladium comes from Russia.

Neon, critical for the lasers used to make the chips, is a by-product of Russian steel production and is then purified in Ukraine.

Palladium is used in sensors and memories.

Neon prices have risen by 600% on the eve of Russia's specialized military operation.

Ingaz produced between 15,000 and 20,000 sub meters of neon per month, which was delivered to China, the United States, Germany and South Korea.

The Srisin company produces between 10,000 and 15,000 cubic meters.

Due to the shortage, the most expensive nitrogen and potassium will lead to a lower harvest in Europe this year.

Brazilian farmers depend on 80 percent of fertilizer imports from Russia.

Ukraine is an exporter of 12% of wheat, 16% of corn, 18% of barley and 19% of rapeseed create a problem in feeding the world's population.

Countries from Asia and North Africa that partner with Ukraine will be affected

70 percent of feed in the EU is foreign-made and comes from Russia and Ukraine.

The EU is the world's largest importer of soybean meal and the second largest buyer of soybean meal.

Exports of 60 million tonnes of wheat from Russia and Ukraine were expected

The United States will export only 22 million tons in 2022 or less than the total of Russia and Ukraine.

Canada should export 15.2 million tons, the EU - 37.5 million tons.

Russia's harvest will increase by 3.6 million to 84 million tons.

Russia has banned the export of nitrogen fertilizers until April, and China - the export of phosphate fertilizers until June 2022, Belarus is the main supplier of potassium in Erohpa. thus, without the fertilizers of Russia and Ukraine, European production will decline sharply

Although Germany is the world's fourth largest producer of potassium, the EU holds only 6%. One and a half million tons or as much as 85% of the sludge is imported into the EU. Even if 1.7 million tonnes of Russian and Belurian potassium are replaced by Canadian potassium, it will be much more expensive for European farmers.

EU fields use 17 million tonnes of mineral fertilizers a year, the most nitrogen - about 11 million tonnes. The EU is 68% dependent on phosphorus from China's leading producer.

30% of the nitrogen used in the EU is due to foreign partners - Russia.

Although it has imposed sanctions, the United States has not imposed sanctions on gas imports because it depends on it. The United States has not imposed sanctions on Russian oil either, because they depend on it.

The reason is the double dependence for Russia, which is 70% of its exports, and for Europe - 27% of its apparent gas.

Nitrogen and potassium are the most risky fertilizers for Europe.

Fertilizer prices will rise and deliveries will be hampered, On March 4, 2022 Russia banned the export of mineral fertilizers.

Food crisis Europe is sanctioning businessmen like Melnichenko, who owns EUROCHEM and SIECK, Russia's largest producers of ammonium nitrate and coal.  
 Putin himself has warned that food prices will rise worldwide.  
 The West is creating problems for Russia's fertilizer exports, which account for 13% of world production.  
 Russia is a major producer of potash, phosphate, nitrogen essential nutrients for crops and soils.  
 The Russian "Eurochim" is one of the 5 largest cargo companies in the world.  
 This will lead to high food inflation in Europe and food shortages  
 Global food costs will rise by another 22 percent  
 Expenses are food as a percentage of individual income  
 Sub-Saharan Africa - 34%  
 South Asia - 27%  
 Latin America - 18%  
 Middle East and North Africa - 18%  
 Europe and Central Asia - 14%  
 North America - 8%  
 Ukraine supplies 13% of the amount of corn

## **6. THE MURDER - FINANCIAL WEAPONS - THE RUSSIAN CENTRAL BANK TO SELL RUBLES FOR GOLD, BECAUSE IT HAS A GOLD COATING.**

**And with the rubles the enemy countries to buy RAW MATERIALS, GAS, OIL, Coal and others.  
 This will lead to the impoverishment of the West and the United States of gold reserves and a practical collapse.**

## **7. GOALS OF THE DEEP MAFIA OF THE USA AND NATO ON THE WAR OF RUSSIA IN UKRAINE AIMING NON-INTERFERENCE**

These are the goals of the DEEP MAFIA, of the Financial Banking Resource Technological MAFIOTIZED MATERIALISM of the fascist criminal Masonic mafia elite.

It is no coincidence that Putin once called the United States a "world parasite."

The United States is king for provoking wars, for destroying goals, nations, states, for plundering their resources.

The United States is the king of creating occasions to organize and wage wars against sovereign states with the ultimate goal of seizing their resources - IRAQ, Afghanistan, Libya, Syria

Through sanctions to put pressure on Russia. Through aid from other countries such as Germany, the Netherlands, Italy, Britain to supply weapons, troops and others to Ukraine, to provoke a war between Russia and NATO.

Through sanctions to set the oligarchs and the people of Russia against Putin and to finance the overthrow of Putin or the oligarchs to finance this process themselves.

7.1.1 /. To cause a rift in relations between Germany and Russia, as an economic union between Russia and Germany would be disastrous for both the United States and Britain, as well as for EUROPE.

7.1.2 /. The goal is for the United States to replace Russia in gas supplies to Europe.

The United States is the largest producer of shale gas, the cost of production is high. As gas prices rise, US shale gas prices in Europe are becoming more competitive

The aim is to bankrupt EUROPE,

EUROPE imports 46% of coal, 42% of gas, 25% of oil imports from Russia.

The United States is seeking help from Qatar to replace gas supplies with liquefied natural gas to EUROPE. QATAR refuses, as 97% of its liquefied gas production is long-term.

The ANACONDA plan, developed by Kissinger and Brzezinski and implemented by Soros and Linton.

This plan arose after the surrender of the USSR by Mikhail Gorbachev and after the implementation of the Cold War strategy.

The Anaconda Plan envisages the encirclement of the Russian Federation with NATO and US military bases, American bases, NATO bases, Western bases, and the establishment of NATO military bases in the countries of Eastern Europe. Russian anger is expected to be surrounded both outside and inside. The environment is not only through military bases, through laboratories for biochemical weapons, drug distribution systems in Russia, systems and routes for the transfer of terrorists, jihadists, creating a system for erasing the historical memory of the Russian people, erasing Russian culture, education, education, creation of a system for imposing the gay ideology LGB technology,.

Gas supply from Russia to the following countries in Europe - Finland, Latvia, Lithuania, Estonia, Poland, Hungary, Romania, Bulgaria, Czech Republic, Slovakia, Germany, Netherlands, Belgium, France, Italy, Greece, Slovakia, UK, Spain, Portugal. the big quantities are for Germany, Italy

Germany's economy depends on gas supplies from Russia. Germany has increased gas consumption from 73 billion in 2014 to 86 billion in 2020

2013 Germany imports only 97 billion cubic meters,

2020 Germany imports 155.5 billion cubic meters.

Germany needs 535 terawatts of electricity, but generates only 484 terawatts. It makes the difference through imports.

Germany has no liquefied gas terminals.

Spain, France and the United Kingdom have 29 liquefied gas terminals in the EU,

In Europe 2020, Russia supplies 200 billion. The United States supplies 76 billion cubic meters to Europe. The goal of the United States is to replace Russia in gas supplies and make Europe completely dependent on itself

7.1.3 /. The aim is to break down relations between Europe and Russia.

By creating complete "manageable chaos" in Ukraine in order to stop the supply of energy from Russia to Europe. The goal is to sever relations and ties with Russia over energy supplies.

The goal is to switch to the United States as an energy supplier.

7.1.4 /. Depriving Russia of \$ 700 million in revenue, of which \$ 350 million is for oil, \$ 250 million for gas and \$ 100 million for coal per day. Every day, Europe and the United States pay Russia \$ 350 million for oil, \$ 250 million for gas and \$ 100 million for coal. A total of \$ 700 million a day for energy.

Europe imports 175-200 billion cubic meters of gas from Russia every year. Italy's new renewables, for example, amount to about 0.25 billion cubic meters each year in terms of energy produced. Estimate how many years it will take Italy and Europe to replace Russian gas ...

Norway, the EU's second-largest gas supplier, is producing at full capacity. Neither Algeria nor Azerbaijan can realistically replace imports from Russia. So the missing gas will have to come from liquefied natural gas (LNG) imports.

This is also missing. Suppliers from Qatar to Australia have already told the EU that they cannot do much because their production capacity is being delivered under long-term contracts. Separate logistical problems with transportation from regasification terminals to the end point.

In short, Europe cannot do without Russian gas, and Russia cannot do without European money.

Russia's economy is highly dependent on gas and oil exports. Not only the economy, but also its political growth and influence. 40% of Europe's gas comes from Russia, and even more dependent is Germany, which has pursued a "green policy" and shut down its nuclear power plants and now imports 50% of its gas from Russia.

Russia invests much of its revenue in military technology, which is bringing it back to power because its economy is still quite weak. Which probably worries the United States.

By 2005, about 80-85% of gas to Europe was imported from pipelines passing through Ukraine, which charges heavy taxes from Russia.

For this reason, Russia began construction and projects for South and North Streams. Germany, pressed by the United States, has suspended the Nord Stream-2 project.

7.1.5 /. By creating a crisis in supply, as well as a crisis in production, the crisis of supply routes CAVING the road for shale gas and selling it to Europe. The cost of shale gas is high, but with the aim of the crisis and the war in Ukraine to destroy infrastructure and weaken Russia will lead to the imposition of shale gas in EUROPE.

This "will lead to huge investments in American shale gas production, to the creation of a powerful infrastructure for its processing and supply in Europe, the construction of many liquefied gas terminals in Germany and other countries.

7.1.6 /. In the period 2009-2010, satellite images and analyzes show that there are huge gas fields around Crimea.

The same applies to the regions around Donbass and around Lviv. The volumes are estimated at around 2 trillion cubic meters, which would make Ukraine one of the leading countries in this regard.

That is why the color revolution was organized in 2014 - with the Maidan events, and by financing extreme nationalist anti-Russian movements, fascist organizations and others in the country.

The goal is the denomination and management of these resources in Ukraine. Oil and natural gas

Before the civil war and the secession of Crimea, Ukraine had 381 fields of oil, natural gas and gas condensate. They are unevenly distributed territorially. The majority of them are in Eastern Ukraine (211), followed by Western (112) and Southern (45) Ukraine. The yield from them is small - about 4 million tons. per year and 18 billion m<sup>3</sup>.

There are a number of oil fields in Ukraine (about 50). The studied oil reserves are about 250 million tons. and they are only 0.18% of the world's reserves. In general, oil fields and production are insufficient and the country imports its scarce quantities. Eastern Ukraine has over 50% of the country's oil reserves. The main studied reserves and yields are from the Donetsk-Dnieper region (17 oil fields - Akhtyr, Gnedin, Lelyakov, etc.). Three oil and gas regions have been formed. The Carpathian oil and gas region covers territories from the Precarpathians, the Carpathians and the Transcarpathia. The Dnieper-Donetsk region is located in the Left Bank of Ukraine (east of the Dnieper River). It accounts for about 80% of Ukraine's oil and natural gas production. Black Sea-Crimean oil and gas region covers areas of Kherson, Nikolaev and Odessa regions and part of the Black Sea shelf. The most significant is the Odessa gas field, located on the shelf of the Black Sea. Most and more significant deposits are on the territory of Crimea and are now in Russia.

Unconventional promising gas sources

The use of non-traditional gas sources has significant prospects in Ukraine. These are five sources.

The first is coal gas. He has good prospects in Ukraine. Coal deposits often contain methane gas. It is an environmentally friendly and coal-fired fuel. The gas is unevenly distributed in the coal body. In Ukraine, total reserves are estimated at 8 trillion. m<sup>3</sup> of coal gas methane or 3.1% of world reserves. In Donbass alone, the geological reserves in the coal seams and strata is up to 2.5 trillion. m<sup>3</sup>. There are similar deposits in the Lviv-Volyn coal basin. In Ukraine, the balance reserves in 2010 were 313.9 billion m<sup>3</sup> of coal gas. And in the operating mines alone they are 140.8 billion m<sup>3</sup>.

The second source is natural gas, accumulated in the low-permeability reservoirs of the central parts of the oil and gas basins and located at great depth. In the Dnieper-Donetsk region alone, at a depth of up to 4,500 m, the reserves are 8.5 trillion m<sup>3</sup>.

The third non-traditional source is the gas hydrates (crystalline chemical compounds formed by water and gas at a certain pressure and heat) from the shelf and part of the continental slope of the Black Sea, also called clathrates. According to preliminary estimates, Ukraine (along with Crimea) has reserves of about 7 trillion. m<sup>3</sup>. The clathrates are located among the bottom layers of the Black Sea.

The fourth source is shale gas. It is contained in the bituminous shale found in the bowels of the earth. Ukraine has huge shale gas deposits located in two huge deposits near the largest coal basins. The Yuzov shale gas field is located on the territory of Donetsk and Kharkiv districts and more precisely on the border lands of these two districts. The total area occupied by the Yuzovskoye deposit is 7886 km<sup>2</sup>. The reserves are set at 4.05 trillion. m<sup>3</sup> of shale gas. Ukraine has signed a contract for shale gas exploration and production with the multinational company Shell. The Olesk shale gas field is located in western Ukraine (Lviv and Volyn regions) and is a

continuation of the large Polish shale field near Lublin. The reserves are estimated at about 3.0 trillion. m3 of shale gas. Ukraine has signed an agreement with the US multinational company (TNC) Chevron to use the deposit.

7.1.7 /. Europe has been left without Russian gas in the cold and, accordingly, with problems in consumption and supplies, will not look at the high prices of gas from the United States, which will quickly eliminate its financial problems. In this way, Europe will pay twice and three times more for expensive American shale gas, but will thank it for getting rid of Russian influence.

The largest shale gas fields are in Luhansk and Slavyansk. In the land of Slavyansk, in the same land where the 12-year-old boy was buried, shot on May 9 in the heart of the neo-Nazis of the Rage Sector because he had a St. George's ribbon and is therefore a terrorist and separatist according to the fascists.

7.1.8 /. The United States to take over the energy market throughout Europe, ie. to make the European economy completely dependent on the United States The United States will completely engulf Europe's economy.

7.1.9 /. THE PURPOSE is for the United States to become the beneficiary of this \$ 500-6 billion billion turnover, which is the trade turnover between Europe and Russia, and for this 100-year turnover between Europe and the United States.

7.1.10 /. To spew out false information and constant lies about "Russian atrocities and brutal murders of children and women" in Ukraine, about tens of kilometers of military equipment to Kyiv and other cities, about an advancing armada of ships off the Baltic coast.

The goal is to create fear, threats, hysteria, madness of fear and, on the other hand, to provoke Russia into conflict.

Attributing false things about Russian troops, lies, false things.

7.1.11 /. The aim is to create chaos, unpredictability of the new authorities in Ukraine.

The goal is to implement and implement US plans.

7.1.12 /. The goal is the complete dependence of Europe in Ukraine on peace, which will "guarantee" the United States to boost prosperity and progress, but only with energy, technology and US production. THE GOAL IS TO MAKE MAXIMUM PROFITS FOR THE UNITED STATES SO THAT THE US CAN SOLVE THE DEBT PROBLEM.

7.1.13 / The goal of the United States is to save itself from DEBT to third countries with a debt of more than 17 trillion dollars, which they owe to the rest of the world; because of the \$ 500 billion in trade between Russia and Europe that they want to steal for themselves; because of the preservation of the dollar as a world currency, because the yuan came from the East, and the BRICS countries have just established their own bank and their own currency fund.

US debt is growing by \$ 3.5 billion a day. Each American personally owes \$ 149,000 to creditor states.

The largest US creditors are: 1. China (\$ 2 trillion) 2. Japan (\$ 1.14 trillion) 3. Brazil (\$ 256.4 billion) 4. Taiwan (\$ 185.8 billion) 5. Switzerland (\$ 178, 2 billion) 6. Belgium (\$ 167.7 billion) 7. Great Britain (\$ 156.9 billion) 8. Luxembourg (\$ 146.8 billion) 9. Russia (\$ 131.6 billion) 10. Hong Kong (\$ 120 billion) .).

The goal is to organize a cataclysm that will not affect the United States at all, the citizens, the companies, the industries, the territory of the United States.

The goal is to keep the dollar, the standard of the United States, and at the same time all countries pay for this peace after the war.

7.1.14 /. Ukraine is only an instrument, only a buffer, only an approach of the Nazi offensive against Russia. Ukraine is used as a territory for the United States to deploy its missiles, military bases and shale probes. Ukraine is becoming a territory destined for looting, creating misery, involved in fratricidal wars, discrimination, cleansing and outright genocide against the Russian population in Ukraine. Enlightenment of Russian culture, language, soul, Cyrillic, Orthodoxy, imposition of Nazi ideology, manners, orders.

The goal is to turn Ukraine into a European Iraq, Afghanistan, Vietnam, a European Syria.

And Russia must be plundered, destroyed, the culture, identity, language, orthodoxy of the Russian people violated.

The goal is also complete submission to Europe.

RUSSIA, CHINA and IRAN are a triangle of equal mutually beneficial partnership.

Gas supply from Russia to the following countries in Europe - Finland, Latvia, Lithuania, Estonia, Poland, Hungary, Romania, Bulgaria, Czech Republic, Slovakia, Germany, Netherlands, Belgium, France, Italy, Greece, Slovakia, UK, Spain, Portugal. the big ones are for Germany, Italy

Germany's economy depends on gas supplies from Russia. Germany has increased its gas consumption to 73 billion in 2014 to 86 billion in 2020

2013 Germany imports only 97 billion cubic meters, 2020 imports 155.5 billion cubic meters.

Germany needs 535 terawatts of electricity. However, it generates only 484 terawatts

It makes the difference through imports.

Germany has no liquefied gas terminals. Spain, France and the United Kingdom have 29 liquefied gas terminals in the EU, In Europe 2020, Russia supplies 200 billion,

The United States supplies 76 billion cubic meters to Europe. Russia does not need diplomatic relations with the WEST. Russia with retaliation against Britain - ban on flights of British aircraft owned by British legal entities and individuals,

Britain has suspended flights of Russian companies The ban also applies to transit flights. Britain has imposed sanctions against Russian oligarchs, suspended access to trade in the country, real estate. Great Britain, USA, EC excluded Russia from SWIFT - The main global network for international payments of the deep mafia, ie. it was the "atomic bomb" of financial sanctions. SWIFT is the main secure messaging system that banks use to make fast and secure cross-border payments. Currently, the network system is used by 11,000 financial institutions. It is a system of global finance of the deep mafia.

SWIFT is the main mechanism for financing international trade. Replacing transactions through other systems will make it more expensive and increase costs and create delays. This will be a shock to Russian companies, especially buyers of oil and natural resources,

Russia will direct payments through countries that have not imposed sanctions, such as China, which has set up its own payment system, China's payment system, and its own system, which Russia has built since the 2014 sanctions. to her ..

The ban on SWIFT will accelerate Russia's use of alternative payment systems Chinese SIRS system

This will harm the US dollar

Russia has set up its own SIRS payment system following the 2014 sanctions. There are over 400 pickers in this system,

Excluding from SWIFT will cause harm to all parties - and the parties to it.

Russia is a huge buyer of goods from the Netherlands and Germany, Russia is a major supplier of crude oil, natural gas and solid fossil fuels, metals, coal, fertilizers, palladium, nickel, aluminum, neon and other raw materials for industry.

European countries will find it difficult to find alternative suppliers.

Russia has a 17% debt to GDP ratio.

Russia has more than \$ 650 billion in foreign exchange reserves, which have been blocked by the United States, Britain, Canada and the European Union, a third of which is in gold.

The goal is to attack a NATO member.

Germany sends arms to Ukraine. Germany allows the Netherlands to send weapons to Ukraine. The purpose is to attack a member of NATO.

An occasion arises. Another false NATO action.

Hungary supports Russia's exclusion from SWIFT.

The European Union imposes sanctions on over 60 leading Russian companies - Sukhoi, Tupolev, Voenno Progress, Kalashnikov, Almaz-Antey, Uralvostzavod, Russian Railways, Kamaz, Sovcomflot, Sevmek - Symmetrical reaction - nationalization of Western assets in Russia, against politicians.

The United States is the largest producer of shale gas, the cost of production is high. As gas prices rise, US shale gas prices in Europe are becoming more competitive. The aim is to bankrupt EUROPE, EUROPE imports 46% of coal, 42% of gas, 25% of oil imports from Russia.

The United States is seeking help from Qatar to replace gas supplies with liquefied natural gas to EUROPE. QATAR refuses, as 97% of its liquefied gas production is long-term.

Sanctions will lead to a decline in basic production. The decline will be followed by fertilizers, which will lead to a decline in agricultural production will lead to famine.

Gas supply from Russia to the following countries in Europe - Finland, Latvia, Lithuania, Estonia, Poland, Hungary, Romania, Bulgaria, Czech Republic, Slovakia, Germany, Netherlands, Belgium, France, Italy, Greece, Slovakia, UK, Spain, Portugal. the big ones are for Germany, Italy

Germany's economy depends on gas supplies from Russia. Germany has increased its gas consumption to 73 billion in 2014 to 86 billion in 2020

Russia's SWIFT ban will accelerate Russia's use of Russia's alternative payment systems.

This will harm the US dollar

Russia has set up its own SPS payment system following the 2014 sanctions.

There are about 400 followers in this system,

Excluding from SWIFT will cause harm to all parties - and to the affected parties.

Russia is a huge buyer of goods from the Netherlands and Germany, Russia is a major supplier of crude oil, natural gas and solid fossil fuels, metals

European countries will find it difficult to find alternative suppliers

Russia has invaded Ukraine, and US President Joe Biden, who has long warned of dire consequences in such a scenario, made a statement from the White House on Thursday, February 24, 2022, about the further reaction of the United States and its allies.

He imposed new sanctions in addition to those he announced on Monday, following Putin's recognition of the two separatist republics on Ukrainian soil. Then the United States left some strong options in case Russia launches a full-scale attack, which is already a fact, writes bg-voice.com.

The White House has previously announced that the president will set out "the further consequences that the United States and our allies and partners will impose on Russia for its unprovoked and unjustified attack on Ukraine." The big question was how far the new sanctions would go and whether it would matter that Putin said last night that he was launching a "special military operation" in eastern Ukraine, but that the action on the ground was like a full-scale war.

Sanctions have been prepared against the Russian president and his associates, against oligarchs and blocking the assets of Russian oligarchs, these companies, a ban on travel to Europe, the United States, sanctions are being prepared to exclude Russia from the SWIFT system.

The new sanctions are the following:

Exclusion of the largest Russian financial institution Sberbank and 25 of its subsidiaries from the US financial system. Sberbank holds nearly a third of the total assets of the Russian banking sector;

"Full blocking sanctions" against VTB Bank, Russia's second largest bank, and 20 of its subsidiaries;

"Full blocking sanctions" against three other major Russian banks: Bank Otkritie, Sovcombank OJSC and Novikombank;

Interruption of the possibility of 13 large state-owned companies to earn money from the American market. The list includes: Sberbank, AlfaBank, Moscow Credit Bank, Gazprombank, Russian Agricultural Bank, Gazprom, Gazprom Neft, Transneft, Rostelecom, RusHydro, Alrosa, Sovcomflot and the Russian Railways;

Sanctions against the Russian elite and their family members. The list is: Sergei Ivanov (and his son Sergei), Andrei Patrushev (and his son Nikolai), Igor Sechin (and his son Ivan), Andrei Puchkov, Yuri Solviev (and two real estate companies he owns), Galina Ulyutina and Alexander Vedyahin;

Sanctions against 24 Belarusian individuals and companies. This includes "two major Belarusian state-owned banks, nine defense companies and seven regime-related officials and elites," according to the White House;

Sanctions against the Russian military;

Sanctions for the import of certain technologies in Russia.

According to the President of the United States, sanctions against Russian high-tech imports will lead to its sharp contraction with the corresponding reflections.

The United States and NATO are taking decisive action to strengthen the Alliance's eastern flank and secure member states there. Biden announced that he had ordered the redeployment of US ground forces and aircraft in Europe to the eastern flank. Additional troops will also arrive in Germany.

The President of the United States announced that he would meet with all NATO leaders for joint action on Friday. He assured that NATO is united and that the United States will fight "for every inch of NATO territory".

The US president has no plans to hold talks with Putin until a real and verifiable de-escalation is seen as a precondition for diplomatic action.

However, Biden confirmed that NATO forces would not be sent to fight in Ukraine. However, she will receive any other possible help.

Asked whether India supports the West's position on Russia, Biden said consultations were under way to clarify Delhi's position.

The president assured that the United States and its allies are prepared both to face possible cyberattacks and to give a sharp response.

Finland and Sweden cut off Russia for warnings not to join NATO.

On February 27, 2022, they confirmed the warnings of neighboring Russia that their possible accession to NATO would cause "serious military-political consequences" from Moscow for both countries.

Finnish Foreign Minister Pekka Haavisto said on Saturday, February 26, 2022, "We have heard this before."

Finland has a land border of 1340 km. With Russia - the longest border.

The foreign minister's words were confirmed by President Sauli Niinisto, who said he understood what countermeasures Moscow would take if India joined NATO.

In Sweden, Prime Minister Magdalena Andersson on Friday with Swedish Military Commander Michael Biden.

Finland and Sweden work closely with NATO, although not members, military cooperation with US and UK

February 26, 2022 Germany takes historically determined food to send weapons to Ukraine, violating the principle of sending weapons to the conflict zone.

This is a precedent and the first violation of the rules by Germany.

Germany will send 1,000 anti-tank systems and 500 Stingers for air defense. LNG will be sent from the Netherlands at the request of the German authorities. Germany allowed the Netherlands and delivered 400 German bazookas to Kyiv,

Poland, through Polish Prime Minister Mateusz Morawiecki, accused the German government of "selfishness" in the conflict in Ukraine.

Berlin promised 5,000 safety helmets,

Poland supplies ammunition by land, while Estonia and Latvia supply fuel, pro-tank weapons and medical supplies to the Ukrainian border

The Czech Republic and Slovakia have also announced that they will send fuel and ammunition.

The United States approves \$ 1,850 million in funding for Ukraine's defense

Zelenski demanded that NATO be provided with nuclear weapons.

THE EUROPEAN UNION IS PREPARING MILITARY AID.

THIS IS ALREADY INTERVENTION in the conflict and a real violation of international law.

The countries of Europe and the United States decided to exclude Russia from SWIFT, to confiscate assets in Russian oligarchs, to confiscate assets, to confiscate money in banks in oligarchs.

THE PURPOSE IS TO CREATE AN CONFLICT BETWEEN THE OLIGARCHS AND PUTIN.

The goal is for the oligarchs to get angry and take funding measures to oust Putin as president.

THE OBJECTIVE IS TO CREATE AN INTRIGA - CONFLICT, after Russian oligarchs lose 39 billion euros in just one day, after blocking the assets of these oligarchs in Europe.

Switzerland is involved in these sanctions.

The United Kingdom is imposing an unprecedented set of economic sanctions on Russia, including pushing for Russia to stop using Swift's international payment systems, freezing the assets of all major Russian banks, limiting the money held by Russian citizens in UK banks and sanctioning to more than 100 individuals and legal entities, the Guardian reported.

- Boris Johnson called on European leaders to agree that Russia's use of the main payment system should be stopped, arguing in a conversation with German Chancellor Olaf Scholz and a meeting of G7 leaders. This move is likely to receive resistance from EU countries.
- Announcing a package of sanctions that Johnson vowed to "hamper" the Russian economy, the prime minister said legislation would be introduced on Tuesday to ban major Russian companies from raising funding in the UK market and prevent Russia from to raise public debt in the UK markets.
- The sanctions also include key oligarchs whose assets will be frozen, although sources say more names - including what they say will be more recognizable figures - will be announced in the coming weeks.
- The Prime Minister announced 10 measures to be taken by the United Kingdom immediately. The United Kingdom will freeze the assets of all major Russian banks, including VTB, the country's second-largest bank with assets totaling 154 billion pounds.
- Individual sanctions will be imposed on more than 100 individuals, legal entities and subsidiaries, including Rostech, the country's largest defense company, which exports arms worth £ 10 billion a year, as well as four other defense companies.
- The oligarchs to be sanctioned include Putin's former son-in-law Kirill Shamalov, Russia's youngest billionaire; Denis Bortnikov, Chairman of the Management Board of VTB Bank; and Yuri Slyusar, director of the United Aircraft Corporation. The Russian airline Aeroflot will be banned from landing in Britain.
- The United Kingdom will suspend and ban all dual-use export licenses for Russia that cover items that could have civilian or military use. There will also be legislation banning a wide range of high-tech exports to Russia, including semiconductors, aircraft parts such as Rolls Royce jet engines and refining equipment.
- The government will set out in more detail in the coming days on new legislation to limit deposits that all Russian citizens can hold in UK bank accounts, designed to stifle Russians' ability to raise money and keep their money in London.
- Expand the full range of measures against Belarus that Russian forces have used to invade Ukraine, treating the country as subject to the same sanctions regime as Russia. The latest measure is a commitment to present a bill on economic crime before the Easter holidays, aimed at making assets more transparent.
- EU ambassadors met in Brussels on Thursday afternoon to discuss a large package of sanctions in the financial and energy sectors, including export controls on key components.
- Some Conservative MPs have called on the UK to increase military aid to Ukraine, including former Cabinet Minister David Davis, who said the UK should consider providing air support to Ukraine's armed forces.
- Davis said that "even the most brutal sanctions ... are no longer a deterrent, they are a punishment" and that the invasion of Ukraine means that Vladimir Putin "has effectively declared war on the West."

- Alicia Kearns, a Conservative MP and former senior communications officer at the Ministry of Defense, said Britain, which provides defense support in Ukrainian airspace, should be "at the table and under discussion".

## 8. ECONOMIC DATA PROVING THE DISSOLUTION OF GLOBAL NEOLIBERAL CAPITALISM AND THE DEEP MAFIA DOLLAR FINANCIAL MATRIX AS A RESULT OF PUTIN'S COUNTERMEASES

During the heyday of February 24, 2022, there was wild rage, coordinated mass lies and political rage from the United States and NATO and Britain, Canada, Australia, the European Commission against Russia.

The more violently they curse Russia, the better it is.

Ursula von der Leyen has long hated Russia 7-8 years ago as Germany's defense minister. Everyone has forgotten the lesson of World War II about Germany

Russia is among countries such as China, the United States and Japan in terms of the number of scientists and researchers. Russia has over 4,000 institutes producing research. They employ 722,000 scientists and researchers.

The amount of research expenditures is growing as 30% are for basic research, 40% of research to accelerate economic and technical development.

2020 Russia ranks 6th and second in Europe in terms of GDP - 4097 trillion US dollars.

### Industry structure of RUSSIA

Agriculture - 4.5%  
 Fishing and fish farming - 0.3%  
 Mining and quarrying - 0.4%  
 Manufacturing 13.7%  
 Production and distribution of electricity, pelvis and  
 Production and distribution of electricity 3.1%  
 Construction - 6.2%  
 Trade 15.9%  
 Hotels and restaurants - 0.8%  
 Transport and communications 7.8%  
 Financial activity 4.4%  
 Education 2.6%  
 Health and social services - 3.8%  
 Other industries - 27.6% - defense

### RUSSIA's largest trading partners

Given that trade between these trading partners will turn into paid yen through the dollar, such as the yuan, this loosens the dollar even more.

Export billions of dollars	Import billions of dollars
1. China - 57.3	1. China 54.1
2. The Netherlands -44.8	2 / Germany - 25.1
3. Germany - 28.0	3 /. Belarus - 13.7
4. Belarus 21.7	4 /. USA - 13.4
5. Turkey - 21.1	5 /. Italy - 10.9
6. South Korea - 15.4	6 /. Great Britan - 9.0
7. Italy - 14.3	7 /. France - 8.6
8. Kazakhstan 14.3	8 /. South Korea - 8.0
9. Great Breatan - 13.3	9 /. Kazakhstan 5.7
10. USA - 13.2	10 /. Poland 5 1

This means that if imports into Russia from China are paid in yuan, it will immediately weaken the value of the dollar in international trade.

European exports to Russia 2021 - is 89 billion euros.

Despite the sanctions, imports are mainly machinery, chemical products, manufacturing, Russia exports oil, gas, grain, metals, wood, and chemical fertilizers.

The most traded types of goods from Russia

EXPORTS billion dollars	Import - billion dollars
1. Oil and solid fuels 211.7	1. Industrial machinery - 43.4
2. Metals 055.6	2. Electric machines - 29.8
3. Metals - 18.2	3. Vehicles and parts - 23.9
4. Precious stones and metals 15.3	4. Medicines - 14.1
5. Machines - 9.0	5. Plastics - 9.8
6. Wood -8.6	6. Precision tools - 7.73
7. Chemical fertilizers -8.4	7. Metal goods - 6.5
8. Grain - 7.9	8. Airplanes - 5.3
9. Aluminum - 5.8	9 Fruits and nuts - 5.1
10. Electrical machines 5.6	10. Metals -5.5

Exports will be paid in yuan, imports of medicines from India may be in rupees.

All other goods that are exported, if RUSSIA HAS TO PAY THROUGH GOLD, this will enslave the WEST and the United States.

Here are the figures that if Russia receives for its exports to China and is paid in yuan, then the hegemon of the dollar disappears.

2020 Russia is the largest exporter of wheat - 10.1 billion dollars, semi-finished metals - 4.5 billion, frozen fish - 2.6 billion, crude oil - 2.3 billion, cast iron - 1.34 billion dollars.

Major world exporters of wheat million tons

Russia .37.3  
United States 26.1  
Canada 26.1  
France 19.8  
Ukraine 19.1  
Australia - 10.4  
Argentina 10.2  
Germany - 9.3  
India 7.0  
Kazakhstan 5.2

The suspension of wheat exports from Russia has further caused a food crisis around the world, which will raise prices from 25% to 250-450 percent.

Hence the conclusion that the ban on wheat exports from Russia will lead to higher wheat prices worldwide. It is no coincidence that wheat jumped 100-180 percent in just one month.

In practice, Russia can control and manage the occurrence of famine in any country that imports wheat from Russia, ie. friendly countries will not solve the consequences of famine, while enemy countries will know what hunger is and high prices - at least 300 - 800 percent increase.

This, in turn, hits the PETRO-DOLLAR and the DRUG-DOLLAR AGAIN.

Stopping the export of wheat from Russia - leads to higher wheat prices, but also to all bread products not world markets - this leads to starvation, death of hundreds of thousands.

The ban on exports of sunflower and sunflower oil from Russia and Ukraine has led to an increase in the price of sunflower oil - a liter from 1 euro to 4.9 euros per liter in Germany.

On the other hand, Russia is:

- The world's second largest producers of cobalt - 6000 tons
- The world's second largest supplier of vanadium - 18,000 MT-
- Sixth in the world gold exporter - 4.4
- Tenth in the world supplier of lead
- Provides 10% of global nickel supplies
- Provides 12.3% of the world's platinum supplies
- Fourth place in tungsten exports
- Provides 3.5% of world demand for honey

The United States has really turned BRUSSELS and the EUROPEAN UNION into a dairy cow.

The goal - Financial and economic battle and the dollar matrix is a strategic goal of Russia.

Trade between the world's major players on the basis of national currencies - rubles, yuan, rupees and others.

China and India will limit the dollar

Sanctions are hurting EUROPE

Washington violates these sanctions, which are not beneficial to me, they lift sanctions for oil, gas, mineral fertilizers from Russia.

The United States is starting to milk EUROPE.

German ALDI supermarket products up 20-50%

BASF is about to stop. The sanctions will have and will lead to a social collapse - the raised prices and the closure of all German production in Germany and in all countries of the European Union.

Thus, all the productions of Europe became easy prey for the United States as well as for Russia and China.

PRICES comparative at the end of March 2022 of some goods:

	In Russia	EUROPE
Gasoline - 0.40 euros		2.1
Diesel 0.31 euros		1.8
Gas l 1 cubic meter. 0.05		4.5 euros
Electricity -		
For kW / hour 0.04		3.5 euros
Bunch of butter 1 euro		2.2 euros
Sugar - 0.46 euros		1 euro

Russia puts an end to US domination of the world.

It puts an end to the expansion and insane policies of both the United States and its Western allies toward full domination of the world.

International law is grossly violated by the United States - the basis of their activities and practices, rules are violated, laws are violated, occasions for war are created.

In reality, the European Union and the West are operating under US leadership - leading to earthquakes for the WEST and the EU itself.

The number of Sanctions Russia it - February 22, 2022 - 2754, Until March 6, an additional 2778 - a total of 5532 sanctions. Leading sanctioning countries - USA - 1194, Canada - 906, Switzerland - 824, EU - 766, Australia - 644, Great Britain - 271

Data on Exports of Nuclear Fuel for Nuclear Power Plants -

Sweden - 25.1%  
 Russia - 23.8%,  
 Spain - 9.81%  
 Germany - 7.62%  
 France - 6.39%  
 China - 5.26%  
 USA - 8.33%  
 South Korea - 5.45% e

If Russia imposes the practice of paying for its exports with gold, it will lead to bankruptcies.  
 The United States is envious of Russia's nuclear fuel.

Imports of gas from Russia billions of cubic meters of gas

- Germany - 42.6  
 - Italy - 29.2  
 - Belarus - 18.8  
 - Turkey - 16.2  
 - The Netherlands - 15.7  
 - Hungary - 11.6  
 - Kazakhstan - 10.2  
 - Poland - 9.6  
 - China - 9.2  
 - Japan - 8.8

Forcing the Russians to pay in rubles, which are bought with gold, will lead to bankruptcies in the West.

The same applies to wheat exports - Russia 16%, 9% Ukraine, 15% mineral fertilizers from Russia, 5% from Belarus, 3% from Russia - corn, 13% Ukraine,  
 iron - 14% of Russia, 9% Ukraine, Sunflower oil - Russia - 7%, Ukraine 13, Belarus - 2% and Nickel - 16% Russia,  
 oil - Russia - 12%, Wood - 10% Russia - 2% Ukraine, Silver - 12% Russia, Gas - 9% Russia, Uranium - 8% Russia,  
 Aluminum - 7%, 1% Belarus, Copper - 4%, Iron - 2%, 3% Ukraine, Gold - 2% Russia.  
 World food prices jump by 13%, in March from mid-2020 to March 2022 - indicated by 75%

The refusal to import Russian coal leads to an increase in the price of gas, from which Russia earns more than coal, which is one 3.82 "of Russia's total exports

RUSSIA 2019 EXPORTS FOR 474 BILLION DOLLARS.

EXPORTS FROM RUSSIA ARE 40% OIL, 15% GAS

800 MILLION EURO PER DAY OIL AND GAS TO RUSSIA.

Russia's energy revenues for 2022 - 300 billion dollars.

In 2021 there are 180 billion, in 2020 - 90 billion, in 2019 - 225 billion

Tankers leaving the Russian port for March 2015 - 100, 2016 - 117, 2017 - 122, 2018 - 122, 2-019 - 142, 2020 - 140 tankers, 2021 - 123, 2022 138 tankers

2020 The EU imported 9.3 million barrels / day of crude oil and 5.6 million barrels / day of refined petroleum products from Russia

31% of crude oil comes from Russia, 17% of refined products - too.

A sharp break will lead to a LACK of 3 million barrels / day of oil levels and 0.95 million barrels / day of refined rolls - diesel, gasoline and naphtha.

The trust in Putin by Russian citizens

March 2022 - 44% trust in Putin, February - 34%,

83% of people approve of his actions, in February it was 71%.

#### Dependence of European countries on Russia

Country of oil	gas
Bulgaria 75-100%	75-100%
Угари я- 75. 100	75 - 100
Slovakia 75 - 100	75-100
Latvia - 75-100	
Slovenia 75-100	
Czech Republic - 25-50	75-100
Romania 25 –50	75 - 100
Estonia -0- 25	75- 100
Poland - 50-75	50-75
Lithuania 50-75	25-50
Croatia - 0 -25 -	0 -25

AFRICA IMPORTS OF WHEAT - 30.1% from Russia, France - 14.7%,  
Ukraine - 10.7, Canada - 10%, USA - 8.2%, Argentina - 4.8%, Germany - 3.7%, Australia - 1.4%, China - 0.2%,  
India - 0 .2%

Germany is starting to build 3 terminals, and they will be ready in 2027

Qatar has sold all its gas by 2026, as have other countries.

Europe aims to replace 70% of Russia's gas this year with another.

The remaining 30% will be replaced until 2027.

FROM RUSSIA AND UKRAINE - 14% of world corn exports

26% of wheat exports, 58% of sunflower oil exports

Expect a rise in the price of oil from \$ 95 to \$ 122 / barrel.

The use of wheat from Russia and Ukraine for African countries.

EGYPT -	60% FROM Russia and 20% from Ukraine
Sudan -	70% Prussia 5% Ukraine
Benin -	100% Russia
Somalia -	32% Russia - 68 5 Ukraine
Tanzania -	62 % Russia, this 2% of Ukraine
Rwanda -	62% Russia
Madagascar -	60% Russia
Burkina Faso -	54%, Ukraine - 4%
Zambia -	30% Russia, 30% Ukraine
Tunisia is	8% Russia, 48% Ukraine
Uganda -	43% of Ukraine, 8% of Ukraine
Burundi -	54% Russia
Namibia -	42% Russia
Togo -	44% Russia
Kenya -	34% Russia - 8% Ukraine
Libya -	18% Russia - 39% Ukraine
South Africa -	30 "Russia, 5% Ukraine
Mozambique -	37% Russia 4% Ukraine
Mauritius -	17% Russia 30% Ukraine
Burundi	50% Russia
Namibia -	43% Russia

Russia exports 100% of its zinc to Europe  
From copper - 54%, from aluminum 57% in Europe

Inflation will rise to 5 - 45%.

Since 2007, Russia has a surplus exporting more goods than it imports  
2022 is the lowest result -

The increase in copper prices from January 1 to March 6%, platinum - 11%, gold - 9%, zinc - 1716%, aluminum - 33%, grain - 28%, palladium - 54%, wheat - 39%, pickle - 148%

## 9. CONCLUSION

All the data proofs that PUTIN activities against the Sanctional Economic war from USA, Europe and other countries give profits for dismantling the global neoliberal capitalism and the financial matrix of the deep mafia and hegemony of the United States after the declared Economic Sanctions War against Russia, and if he sells raw materials for gold he will bankrupt the West and the United States.
